

iCT220

All-in-one payment device

- EMV capable, prevent fraudulent transactions with Chip and PIN security.
- NFC enabled, easily accept contactless payments, such as Apple Pay and Google Wallet.
- Supports credit and PIN debit transactions with internal PIN pad.
- Dual communication: both dial and high-speed IP connection supported.
- Telium 2 technology installed for high speed transaction approvals.

iCT220

Secure data

Contactless payments

Supports Apple Pay

Compact, intuitive and easy to use

All-in-one device

EMV capable for Chip and PIN entry

Dial and IP connection

Supports multi-merchant

EMV Chip Technology

EMV chip technology is becoming the global standard for credit card and debit card payments

- Embedded microprocessor chip that stores and protects cardholder data
- Increases security and enables the use of future value-added applications as the chip is embedded on the card
- Reduces fraud and related chargebacks
