

# JUNIOR CHEFS

The Junior Chefs program connects students to their food sources through a culinary education program in the school kitchen. Students work in the school kitchen for short periods of time on a daily basis as they master core culinary competencies with the help of the kitchen staff.

Teaching students how to cook equips them with essential life skills such as:

- Culinary Skills
- Teamwork
- Accountability
- Safety and Sanitation
- Organization
- Creativity
- Serving others and working towards a common cause where everyone benefits
