

Packing Guide: Carton Liners

PEAKfresh LINERS slow down the natural ageing process of fruit, vegetables, and flowers by removing harmful gases and ensuring produce does not dehydrate. Made of low-density polyethylene film, impregnated with a natural mineral **PEAKfresh** is an easy to use solution for the protection of your produce.

To use **PEAKfresh** CARTON LINERS pre-cool the post harvest produce to normal storage temperatures, pack the produce in the following manner and keep the 'cool-chain' closed.

PEAKfresh CARTON LINERS come in a variety of sizes to suit all carton dimensions and produce types. Available packed in cartons or on perforated rolls standard sizes include:

- 10 kg Broccoli Bag; 10 kg Lettuce Liner; 10 kg Stone Fruit Bag; 5 kg Cherry Liner; 2kg Cherry Liner.

Liners can be custom made to required size and colour. Custom printing is also available.

Line the carton with your **PEAKfresh** bag and pack your pre-cooled produce

Simply fold the bag over and keep your 'cool-chain' closed

Produce can be removed when required and the bag refolded, no need for any clips or seals!
