

Packing Guide: Pallet Covers

PEAKfresh PALLET COVERS are used extensively for the storage and transportation of strawberries around the world.

PEAKfresh is made using a unique mineral that allows the package to create a modified atmosphere. This assists in the control of Botrytis while reducing the respiration rate, thus maintaining maximum weight and extending shelf life.

To use PEAKfresh for strawberries you simply cover the pallet with the liner and ensure that the bottom is not sealed. With the ease of use and storage of up to 14 days PEAKfresh is the perfect solution to ensure your strawberries stay fresher for longer.

Keep pallet opening free and clear from obstructions.

Continuous airflow is required.

Blunt the sharp edges of each top corner.

Staple directly to corner of carton or pallet.
