YEARS

## LOT PRO<sup>LD</sup><sup>TM</sup>

Designed for residential contractors, Lot Pro<sup>LD</sup><sup>TM</sup> is a rugged and easy-to-use 7'6" steel or poly snow plow ideal for tight residential areas or long driveways. Made for 1/2-ton pickup trucks with snow plow prep packages, contractors will appreciate increased maneuverability in snowy conditions and not having to compromise on quality construction.

### Highway Inspired Black Iron

Behind the moldboard is totally redesigned black iron consisting of a robust, tubular steel A-frame and pivot bar. Highway plow-inspired, this simplified design creates a stronger plow at key pressure zones and more evenly distributes the load. The pressure zones are further enhanced by three, reinforced points-of-contact and a tubular bar along the entire back of the moldboard for increased torsional strength.

### The Choice Is Yours

Lot Pro<sup>LD</sup> moldboards are available in poly or steel.

Poly

Carbon Steel
