

WZ SERIES

SLIDE-AWAY GATE

4,400 lb. and 5,500 lb. Capacities

**Versatile Design
Maximizes Productivity**

STANDARD WZ SERIES ADVANTAGES INCLUDE:

- Slider design is compatible with both roll-up and swing-type doors. The advantages of swing-type doors include maximum use of interior cargo space and maximum door opening capability for easy loading and unloading.
- Dual-lift and dual-tilt cylinder design allows for more positive platform control, greater load stability, and enhanced speed and reliability even in cold temperatures
- Cylinder tilt feature allows the operator to level the platform no matter what the terrain
- Torsion-assisted platform is lightweight, corrosion-resistant, and easy to fold and unfold
- Chain Driven slide system powered by a hydraulic motor provides smooth, even movement of the platform into and out of its transit position
- Power Up / gravity down / power tilt hydraulic system
- Electric cylinder locks prevent the platform and cargo from lowering in the event of a hydraulic line failure
- Platform marker lights provide increased visibility and safety while the liftgate platform is in the open working position
- Powder coat finish on key liftgate components produces a high-quality finish that is exceptionally resistant to corrosion and abrasion

A large tilting platform that adjusts for varying grades, puts your cargo on level ground.

WZ Series Gate in stowed position

SLIDE-AWAY GATE

Platform from stored to raised position

SPECIFICATIONS

Bed Ht: 44" - 53"

MODEL	CAPACITY	PLATFORM	PLATFORM CONSTRUCTION	RAMP
WZ-44	4,400 lbs.	71" x 96"	Aluminum	Wedge
WZ-44	4,400 lbs.	79" x 96"	Steel/Aluminum	Wedge
WZ-55	5,500 lbs.	71" x 96"	Steel/Aluminum	Wedge
WZ-55	5,500 lbs.	79" x 96"	Steel/Aluminum	Wedge

Note: Minimum of 85" clearance/overhang required

OTHER STANDARD FEATURES:

- Thermally protected power unit shuts down the power to the liftgate before heat build-up or low voltage due to a bad ground can cause permanent damage to electrical components. This feature minimizes costly downtime and repairs
- Steel/aluminum or all steel platform for superior strength and durability
- Stationary push-button control box lets the driver operate the liftgate in full view of the rear of the vehicle, platform and cargo
- Hand-held remote control lets the driver operate the liftgate from the ground, platform or bed level
- Weather-resistant power unit enclosure protects vital liftgate components from corrosion and other weather-related damage

OPTIONAL EQUIPMENT:

- Cab Shut-Off Switch allows operator to shut off power to control switches, preventing unauthorized use of the liftgate
- Auto-tilt feature tilts the platform down at ground level when lowering the gate, then returns the platform to level position before raising
- Split cart stops keep one or two rolling carts secure on the platform while the platform is being lowered, raised or leveled. The split allows the operator to move a single cart off the platform, while the second remains retained
- Customized Options – contact factory
