## About Noted Technology Solutions

NTS is a Certified Small/Micro Business with CA DGS. We are a reseller of IT hardware/software, various electronics/tools, as well as office supplies in the Public Sector markets. If you require assistance of any kind - including product/price comparisons or analysis, we have professionals with the knowledge and resources needed to deliver what your agency needs. Our Account Executives often meet with their clients face-to-face to discuss any pain points or concerns you may be experiencing. We provide you with solutions that are tailored to meet your specific needs.

## How We Are Different

Our company's founders have 15+ years in the IT industry, and everyone in our sales staff has over a decade of experience meeting their client's needs. We think outside the box to solve even the toughest issues that your agency may be facing. We do this by working as a team with our customers, never pressuring them and always keeping everyone in the loop. One of the biggest frustrations we hear about is that vendors often make promises that they do not keep. Our company is very sensitive to this, so we make sure never to over-promise or under-deliver.

## Industry Overview

Our nation's IT world is constantly changing. New products are invented almost daily and keeping up-to-date can be difficult if you already have other tasks that you are responsible for. Government procurement processes also require that you are spending public funds appropriately. So how do you balance procurement of the most current IT products while staying within your agency's allotted budget? Our solution is the value-added services that we can provide. Dedication to you as the client should be the main focus. Ensuring that you receive your orders in a timely manner is a priority, which is where NTS shines. It is extremely important that we maintain proper communication with our customers on the ETA of deliveries as well as deadlines for projects.

## Our Value Proposition

At Noted Technology Solutions, we understand government procurement processes, as well as the specific challenges associated with managing each government contract. We believe the key to a successful project is paying extraordinary attention to detail from the planning stage through implementation. During this process, we work very closely in planning and designing our client's project. We aggressively manage costs, quality, and schedules during the project. Our use of the best practices coupled with our extensive experience allows us to provide the best IT solutions that meet your specific needs. We take pride in our technical competence and our sensitivity to the unique cultural climate of each Government agency. The most important benefit we offer is meeting or exceeding your expectations with our consistency in performance, quality, delivery and professionalism.

## Call Us Today!

We will discuss your needs and explore potential strategies to stretch your budget dollars while maintaining quality products that you expect and depend on.
