

## **Policy Statement**

### Allergen Policy:

**IMANA FOODS** (Pty) Ltd is dedicated to having an effective allergen control program in place. All practical steps will be taken to prevent the contamination of food products by allergens. In this regard:

1. Soya and wheat are used in a large proportion of our products. Due to the same equipment being used for the production of all products, it was a concern that it might not be possible to ensure that there are no traces of these, when products not containing soya, and wheat are blended and packed.
2. Product not containing soya and wheat will be labelled to warn the consumer of possible traces of these allergens by including them in the allergen statement.
3. All staff shall be trained on the prevention of allergen contamination (through GMP training) and records kept.

All food labels in South Africa must comply with the latest food labelling and advertising prescribed format.
