The Conference

Registration for the conference is also now open. In addition to the conference, various tours have been scheduled along the same themes as the conference. These are also open for registration. The following themes will, amongst others, be presented during the conference:

- Intralogistics including service robots
- Intelligent vehicles
- Inspection & Maintenance
- Healthcare
- Agri-Food
- Autonomous Harbour
- Open-Source Robotics

The conference also offers a variety of unmanned systems tracks, including security, precision agriculture, construction and geo-mapping.

You can view the preliminary program for the conference at [this link](#).

About the International Robotics Week

The International Robotics Week unites the RoboBusiness Europe, TUS Expo and ROS Industrial Summit trade fairs and conferences, making it one of the largest robotics events in the world. More than 4,000 visitors are expected from across the globe. The conferences will be held at the World Forum in The Hague, hosting an extensive program of events in and around the cities of Delft, Rotterdam and The Hague.

About the organisers

TUS Expo and RoboBusiness Europe are organized by Robo Business Media and powered by RoboValley.
