

Greg Zigulis
Certified Safety Professional,
Certified Industrial Hygienist, MBA

EXECUTIVE PROFILE

Strategic, forward thinking transformational leader with more than 20 years of solid, top-producing results in operations within manufacturing, construction, mining and other industries. Track record of impacting organizational performance with respect to workforce safety and environmental health. Proven ability to build and lead high-performing and complex organizations in a multi-cultural environment and to work with networks of technical professionals. Known for creating opportunities for direct and indirect reports to optimize performance and meet business challenges. Impeccable ethics and integrity.

LEADERSHIP INSIGHT

A hands-on EHS leader who believes building sustainable business models in challenging economic climates requires:

- Integration of sustainable design and engineering operations into the center of the organization's mission and culture
- Implementation of EHS Management systems within the fabric of business processes
- An EHS team that understands the business and how it can add value

EXPERTISE AND KNOWLEDGE

- World-Class Manufacturing
- New Plant & Facility Start-Ups
- High-Performance Leadership
- International Operations
- Work-Site Analysis/Planning
- Leadership Development
- Construction Safety
- Sustainable Processes
- Strategic Planning & Goal Setting
- Lean Manufacturing
- Health/Safety Compliance
- Talent Acquisition & Retention
- Continuous Improvement
- Risk Management Practices
- Metal/Non-Metal Mining Safety
- Sustainable Manufacturing
- Vendor Contracting/Management
- Budget/Cost Controls

Greg's expertise was instrumental to our launch of the most efficient North American engine manufacturing facility of its type. He joined our team during the early planning phase, identified a plan for every facet of health, safety and environmental operations, gained the support of both in-house and partner firm colleagues, and from construction through volume production, successfully established our industry-leading programs.

Mark Dunning
Former Senior Manager,
HR - Global Engine Manufacturing Alliance LLC
(Now FCA Dundee Engine Plant)

CONSULTING

Health, Safety & Environmental Program Consulting

About Our Consulting Services

Helping organizations to achieve transformational health, safety and environmental (HSE) changes that can help provide competitive advantages; audits and organizational assessments, risk-based improvement plans, integration of HSE with other business processes. Retainer or special-project based Safety, industrial hygiene and environmental services.

What We Offer

- Transformational HSE program development and integration with other business processes
- Organizational assessment, safety culture change
- HSE Management System development and implementation (for example, ISO 14001)
- Workers' compensation trending and analysis and recommendations for cost minimization
- Process modeling, analysis of total program costs, cost determination and reduction
- Programs to help ensure organizational Compliance (auditing, assurance, reporting, review)

TRAINING & WORKSHOPS

About Our Training Services

Helping organizations to recognize risk and develop prioritized solutions and action plans. Development and provision of cultural, technical and regulatory based safety training programs. Facilitation of employee-participative programs such as for behavior based safety, ergonomics assessment teams and safety committees. Assistance with the development and implementation of HSE related continuous improvement programs and workshops.

What We Offer

- Hazard recognition, the understanding and prioritization of risk, decision-making
- Employee participative programs (e.g. safety committees, behavior based safety, ergonomics teams and assessments)

PROGRAM DEVELOPMENT

About Our Development Services

Health, Safety and Environmental Management System development and implementation assistance. ISO/OHSAS program development. Company-tailored plans and programs such as for confined space entry, hazard communication, machine guarding, ergonomics assessments and improvement, hearing conservation, respiratory protection, injury & illness prevention programs, and incident investigation and reporting programs.

What We Offer

- Tailored safety plans; specific programs such as for confined space entry, hazard communication, machine guarding, ergonomics, hearing conservation, respiratory protection
- Injury prevention and incident investigation programs that get to "real" causal factors and solutions
- Best-practices for contractor safety; programs for contractor pre-qualification and award

SITE ASSESSMENTS/SURVEYS, AUDITS & SUPPORT

What We Offer

- Due diligence and new plant start-up assistance, equipment specifications and approval processes.
- Facility audits
- Air sampling for chemical exposure assessments with subsequent analysis and interpretation of laboratory results, assessments of physical stressors
- Site safety and health support

Greg Zigulis is at the top of his profession, easily one of the best and brightest engineers I have known. Smart-as-can-be, honest, and a genuine pleasure to deal with, Greg Zigulis impressed me as the person I would turn to when faced with nearly insurmountable engineering challenges. He is in a class by himself in terms of environmental health and safety—a distinction I am very careful not to use lightly.

David Carey
Brigadier General, U.S. Army (Ret)
