

The Swimsuit Dryer Company
Manufacturing The Next Generation Swimsuit Dryer

Important Pre-Installation Checks

Before purchasing a Swimsuit Dryer please consider the location and environment, please follow our recommendations as these will increase the optimum efficiency and life expectancy of our Product:

Temperature:

Please make sure the temperature of the location is no more than 40 degrees Celsius.

Wet Area (**Important!**):

The Swimsuit Dryer should be installed in a dry, or semi-wet area which permits electrical equipment. **For optimum life efficiency we recommend the Swimsuit Dryer is installed 2 – 3 meters away from any wet area / high humidity area (i.e Shower area).**

Power & Drainage:

Please check you have suitable drainage and power available.

Fixings:

The wall which the Swimsuit Dryer will be fixed to must be able to take the weight of approximately 30kg.

Safety:

Please make sure a qualified tradesman installs the Swimsuit Dryer and he fully adheres to all local laws, regulations and has understood the Installation user manual.
