Martex[®] AirFlow[™] Mattress Topper

innovative performance and comfort

The Martex[®] AirFlow[™] Mattress Topper is a new innovative layered mattress topper designed to regulate temperature and air flow while providing maximum comfort for guests by using DuPont[®] KwikWik[™] performance fibers. DuPont[®] KwikWik[™] is a performance fiberfill that wicks away moisture to regulate body temperature and decrease drying time.

The top layer of the mattress topper is a breathable mesh fabric that optimizes air flow between the guest and the mattress. The middle layers are comprised of DuPont[®] KwikWik[™] batting and memory foam. These layers work together to provide increased air flow, temperature regulation and breathability while providing loft and comfort. The bottom layer is a brushed, breathable microfiber.

All the layers are then stitched together with a Chevron quilt stitch to create loft and adds even more comfort for guests. The mattress topper is secured in place by four 2" anchor bands in each corner to minimize movement.

Martex[®] AirFlow[™] Mattress Topper

innovative performance and comfort

Martex[®] AirFlow[™] Mattress Topper

- 100% Polyester Fabric
- Designed in layers to provide optimal air circulation and temperature regulation.
- Layers are comprised of airflow spacer mesh and DuPont[®] KwikWik[™] batting and memory foam.
