

Irving Oil Discount (At the Pump):

Irving Oil is offering a 3 cent per liter discount, applicable to all member companies who hold fleet cards. If your company currently has an active commercial account, the Association would simply contact Irving Oil on your behalf and have the discount added to your account. When you then would receive your monthly statement from Irving Oil, you would see the 3 cent discount applied to your billing statement. If your company does not currently hold fleet cards, you would have to apply for an account with Irving Oil by clicking on this link http://www.theirving.com/assets/base/pdf/2013_CCapp_CA_EN.pdf and completing the application form. Once you have your account set up, we could then have the discount applied to your account for you.

Irving Oil Discount (Fuel Delivery)

Also, Irving is offering a discount based on usage for delivery of fuel, either to home or to site equipment. It operates under the same idea... you first have to have an account set up with Irving Oil for fuel delivery service, then the discount, which is based on volume usage, is applied to your monthly statement from Irving Oil. Again, we would ask for you to provide us with your account number and we would have this set up on your behalf.

Please contact us for further information, or to have these discounts applied to your existing accounts...
