

CDPW rotary vane vacuum pumps feature a compact design that yields more air flow per horsepower than many other types of vacuum pumps. All vacuum pumps are available either new or rebuilt – 100% test run to assure the highest quality to published performance. **1yr warranty on parts and craftsmanship.**

Complete C3 Vacuum Pump *(direct replacement for Masport® M3)*

- 78 CFM @ 1225 RPM
- 3 HP @ 15" Hg
- Overall size: 8 13/16" tall x 11 1/16" wide (including shaft) x 10 1/4" flange-to-flange
- Shaft diameter: 25mm
- Weight: 64 lbs. (29 kgs.)
- Standard rotation is CW facing shaft; CCW is available as alternative (specify when ordering).

Complete C5 Vacuum Pump *(direct replacement for Masport® M5WOF)*

- 133 CFM @ 1060 RPM
- 7.5 HP @ 15" Hg
- Overall size: 14 7/8" tall x 12 1/16" wide (including shaft) x 14 5/8" flange-to-flange
- Shaft diameter: 30mm
- Weight: 114 lbs. (52 kgs.)
- Includes Liquid / Oil cooling recirculating jacket cast into pump
- Standard rotation is CW facing shaft; CCW is available as alternative (specify when ordering).

Complete C10 Vacuum Pump *(direct replacement for Masport® M10WOF)*

- 201 CFM @ 1060 RPM
- 10 HP @ 15" Hg
- Overall size: 14 7/8" tall x 14 7/8" wide (including shaft) x 14 5/8" flange-to-flange
- Shaft diameter: 30mm
- Weight: 150 lbs. (68 kgs.)
- Includes Liquid / Oil cooling recirculating jacket cast into pump
- Standard rotation is CW facing shaft; CCW is available as alternative (specify when ordering).

Rebuild Kits: Complete rebuild kit includes 4 high quality long life vanes, 2 bearings, 2 shaft seals, shims, and instructions. Specify model when ordering.
