

Fully equipped fab shop

Recently completed pump for S.FL customer

CDPW repairs and uses all types of dewatering pumps, including diaphragm, rotary, centrifugal and deep well – diesel or electric.

CDPW manufactures over 80% of its dewatering equipment in house at our 39,000 square foot facility in Edgewater, Florida. This gives us the quality and parts availability most of our competitors cannot match. With a fully equipped metal fabrication and service shop, Complete will service, repair or rebuild your pump to original specification. All equipment is 100% inspected and tested before being released to our customer.

In addition, we will build pumps to your specifications. All of our equipment is available for sale or rentals.

We are not satisfied until our customer's needs have been met. Contact us to see how we can work together.

“The finest dewatering pumps and wellpoint equipment since 1923”
