

FUEL PICK-UP / SUCTION DROP TUBE for REMOTE TANK applications

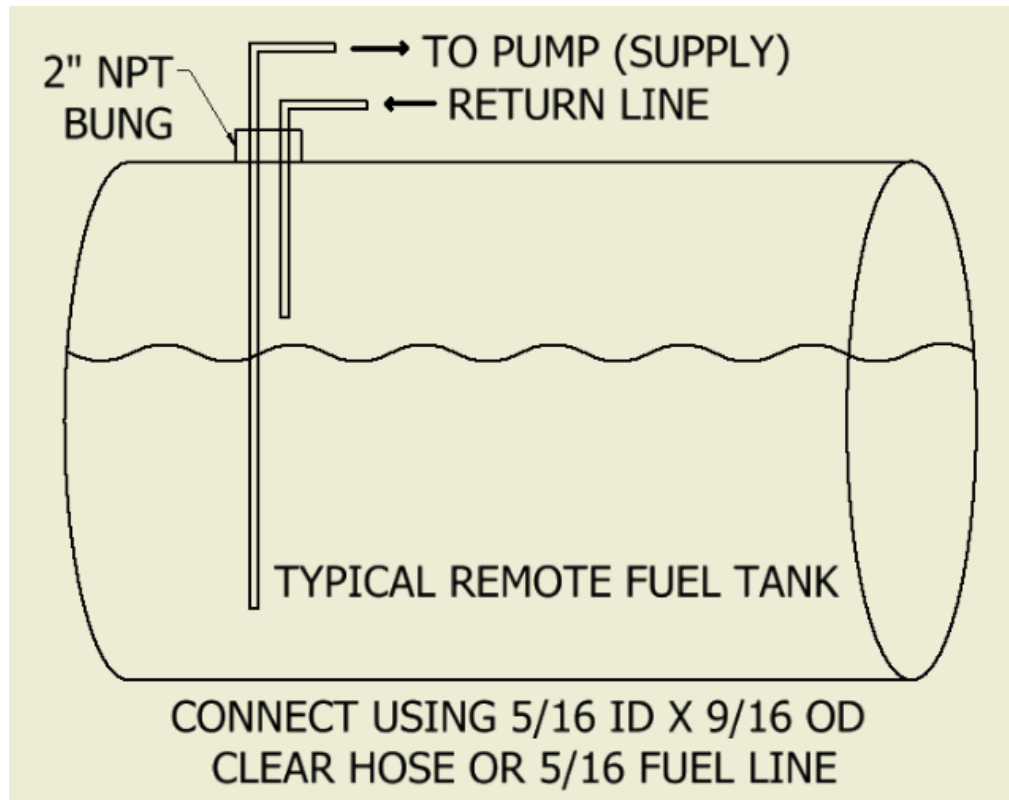

A fuel pick-up is used when a remote tank is provided for fuel consumption. The pick-up is top mounted and includes both a supply and return line connection. Available for one or two pump operation. All steel construction. Typically used with 5/16" ID clear fuel line (provided by user) to connect pick-up to diesel equipment.

2" MALE NPT

42 1/4"
