

BigDataRevealed should become the most desired technology for Big Data Hadoop. We are seeking an acquirer with vision.

BigDataRevealed – The only Big Data Hadoop Data Asset Protection Application with Intelligent Catalogue.

BDR offers Personally Identifiable Information Discovery, any Data Pattern Discovery, Sequester/Encryption/Decryption, Data Securing and Cataloguing with enhanced Metadata.

BDR lives within the Hadoop environment and is not limited to the 'Edge Node'.

BDR's scalability is as limitless as Hadoop itself.

Installs in just a few days and begins functioning immediately.

BDR is Cloudera and Hortonworks Certified.

The following videos speak for the Product and technology.
