**BigDataRevealed Architecture For GDPR / Legacy - for All Regulatory Compliances, Powered by Apache™ Hadoop®**

Slay the GDPR Dragon for Both Hadoop & Legacy Systems with BigDataRevealed The Intelligent & Quickest Path to jump start your GDPR & Regulatory Compliance

We just saw Google receive a fine of 2.7 billion dollars, which it appears Google will not contest. As such, the EU says Google must start giving equal prominence to rival price comparison services. If it doesn't comply within 90 days, the company may be subject to daily fines of up to 5 per cent of Alphabet's daily worldwide turnover, which would amount to about $14 million per day. The European Regulators have flexed their muscles and shown they mean business when enforcing their regulations. Come this May of 2018 the EU has promised to start enforcing their General Data Protection Regulations GDPR that have been in place for the past year. You had better pay attention to what happened to Google because the EU has authority to assess fines up to 4% of annual global turnover, and they are making plans to audit any firm doing business with EU citizens.

With about 10 months to go, how can you not take my offer to either, validate your data to determine if it is currently close to EU GDPR compliant, or audit your efforts to become closer to EU GDPR compliant. We will provide a factual assessment of how well your third-party Consulting or Software vendor have performed by identifying every record/row where data violations are present. After our audit, you can be confident just how ready you are for a GDPR Audit, or know the correct path to reach compliancy.

BigDataRevealed's audit can be completed in as little as a few days or weeks and will remove the uncertainty you may have concerning a large portion of GDPR compliance. If the results show unacceptable levels of unprotected Personally Identifiable Information in either structured or unstructured data we are confident you will want to become a client of BigDataRevealed and let us provide PII discovery, encryption and removal as well as Indirect Identifiers Discovery. Isn't it worth investing that short period of time for peace of mind.

Just sign up for your free audit now for this is a limited offering. http://bigdatarevealed.com/eugdpr-data-audit-assessment-offer or EUGDPRWebinars@bigdatarevealed.com
