As a qualified Hypnotherapist and Reiki master Scott provides individually tailored therapy to his clients - treating phobias, pain relief, anxiety, stress and other issues.

Hypnotherapy for individuals living with neurological conditions may help with pain relief, memory issues, anxiety, stress, confidence issues, loss of motor control etc. Scott also uses SERT Stimulated Emotional Realignment Technique as a means of providing quick, effective relief from pain and anxiety WITHOUT requiring the client-entering trance. This can be useful for those who are unsure of being hypnotised and, what they perceive, as losing control. It has proved very effective in treating clients with these issues regardless of whether or not they are unsure of hypnosis.

If you would like to talk to Scott email or telephone to make an appointment. Tel: 07411946210 email: scott26@me.com
