Venture Business Brokers believes in the American dream and that every business deserves the opportunity to get the necessary funds needed to prosper without a long wait time and without jumping through hoops.

We also believe we have a fiduciary responsibility to you as the business owner, but we also have a responsibility to your family and the people who keep your business moving forward. With that said Venture Business Broker will never offer or push you into a financial position that is not manageable.

Our goal is for every client to think of us as a business partner who will always have your best interest at the center of every financial decision.

Reverse Consolidation

Reverse Consolidation is not Debt Consolidation. One of Venture Business Brokers network partners will deposit monies directly into the owner's business bank account on a weekly basis to satisfy all current cash advance positions. Our partner withdraws a smaller daily payment directly from the business account at an agreed upon purchase of future receivables for an extended payback period. As the current cash advances come to term, less and less monies are deposited into the business bank account until all current cash advance positions are satisfied.

Venture Business Brokers and our partners believe all current cash advances should be paid off. The business owner will continue to pay that smaller daily payment until the Reverse Consolidation program ends. No restructuring or settling with current cash advance funders is necessary.
