

Regional Engine-MFG 2016 Membership Application

Engine Mission

Regional Engine-MFG is a collaborative consortium of large and small manufacturers in East Tennessee. Our focus is to connect manufacturers' needs with manufacturing resources to develop a strong and competitive regional manufacturing cluster.

Goals include:

- Provide the opportunity for regional manufacturers to convene, connect, and collaborate
- Development and implementation of advanced manufacturing and process technologies
- Development and retention of a capable and competent workforce
- Development of a mature, regional manufacturing supply chain
- Development of an integrated "one voice" manufacturer network
- Increased visibility of, and access to, regional support services and assets
- Visibility and access to regional aerospace industry, agencies, and academic institutions

About Engine-MFG. Associate Memberships

Associate Members are enterprises that provide support services to Engine-MFG's manufacturing members. Examples of their services include equipment and parts supply, on-site and off-site repair and maintenance services, banking, taxation, insurance, engineering/design, environmental/waste management, safety, material handling, information technology, and business consulting.
