## Our Company History

Stine Gear & Machine Company was founded in 1970 by Mr. Robert Stine. Before opening the doors, Mr. Stine hired Mr. Guss Harper as General Manager to run the start-up. In 1984, Guss Harper bought the company from Mr. Stine with intentions of growing the business and its capabilities. Throughout the next two decades, he did exactly that!

In 2000, Guss Harper retired from the company, leaving his son, Brian Harper, in charge as President. Brian shared his father's strategy of growth while keeping in mind the importance of quality — a characteristic the company has always been known for.

Brian, along with his wife Suzette, became owners of Stine Gear & Machine Company in 2014 and look forward to continuing the family tradition of custom manufactured gears, sprockets, and power transmission components while expanding additional services such as gear box rebuilds, enhanced reverse engineering and high volume production.

## Industries Served
