

Enable ANY Software with Shipping Features

System integrators, resellers, or any developer responsible for business application software will love the access, control, and flexibility to connect and transact with many freight, parcel, 3PL carriers and shipping services through one API from Pacejet.

- **ERP** systems can add shipping for sales orders, transfers, service orders, or other transactions
- **Ecommerce** websites can expand their freight quotes for more parcel carriers or freight shipping
- **Cloud / SaaS** applications can add integrated Pacejet shipping which is also 100% cloud / SaaS
- **WMS** software can automate pick and packing on mobile scanning and add integrated shipping
- **RF Scanning** software can provide picking and use Pacejet pack and ship for complete automation
- **CRM and Order Management** can add freight quotes for any type of sales order or estimate
- **Purchasing** systems can add freight quotes with rate shopping for drop-ship or inbound shipments
- **Service Management** systems can add shipping for parts or quotes to reduce shipping costs
- **Custom Software** can be enhanced with new integrated quoting and shipping functionality

RESTful API for Multi-Carrier Quote and Ship

The Pacejet API allows any software or cloud application to use Pacejet shipping software functionality for quoting and shipping.

- **RESTful** integration using standard HTTP calls from any programming language
- **Multi-carrier** in one API to quickly integrate freight, parcel, and 3PL into applications with less programming
- **Shipping Execution** allows applications to process shipments, print labels and paperwork, and capture details
- **Freight Quotes with Rate Shopping** allows applications to quote shipping prices with negotiated rates in real-time

Technology Advantages ONLY from Pacejet

Only Pacejet offers 100% cloud / software-as-a-service technology with ALL of these unique advantages:

- **Cloud / SaaS** quoting and shipping for faster implementation and a 40-50% lower cost to own
- **UI or No-UI** supports use-cases with full automation in "headless" mode without user interface actions
- **Carrier Certifications** with UPS, FedEx, USPS, and others are maintained and upgraded continuously
- **Carrier Network** with 50+ parcel, freight, 3PL carriers and shipping services; more added each quarter
- **Cloud Printing and Scale** options provide options for full automation or use the Paperwork endpoint
- **Managed Upgrades** by Pacejet mean new features, carriers, integrations are released continuously
