#### ARTIST STATEMENT

*I have spent much of my life doing photography. I shoot anything that interests me, but over the years I have developed several portfolios that deal with my observations of city and country life: Street Seen, Rain, Graffiti, Reflections ( puddles, ponds, stores) to name just a few. Several of these portfolios require the viewer to gaze down, instead of straight ahead; or to observe how things are magnificently transformed when one is looking “through” water-whether via puddle reflections, pond reflections- or by simply looking out of a window during a rainstorm. I am also fascinated by eroding street markings; to me they are found, “compositions ‘ which can be isolated - to be seen from an entirely fresh perspective.*

*As a result of years of walking NYC streets, I have accumulated thousands of pictures. I see beauty in puddles, and I have spent a lot of time gazing at, or photographing through- wet surfaces. Observed through water- all is transitory and ephemeral; perhaps an alternate reality, if you allow yourself to be drawn in.*

*Gas and Water Caps*

*I also capture street markings. In my “Street Seen “series, I ask the viewer to look down and see the appeal in the lines and shapes that have been created by time, weather and corrosion; crossing lines that have eroded are open to literal, figurative and conceptual interpretations. The worn faces of old or rusted water or gas caps fascinate me as well. There is beauty to be found-even in very simple settings. Food and flowers- in natural situations or as presented in stores or street markets -offer me another reason to pause and shoot.*

*I search for the aesthetic possibilities in that which passersby may overlook: artistry in torn and restructured graffiti, oxidized surfaces, reflections in store windows, flowers and fruit that one has seen a million times. I hope to transcend the “ordinary” of commonplace subjects and afford the viewer an opportunity to perhaps see them in a fresh way.*
