

As Hospital CFO are you interested in quickly increasing profits substantially and Building Financial Security in the New Era of Performance Revenue?

- Why Should You Care?** Increase Bottom-Line Profit 8% -40% in the 1st year – By Financially accepted Standards. Labor costs reductions with no decrease in staff and optimally align your hospitals for the new era.
- How Real is This?** It's so real and scientific we won't charge you anything until you understand and agree with projected results. And at any time you are not satisfied, you simply cancel the contract. No long-term contracts. HealthViZion was selected above IBM, Oracle, SAP and ADP as the platform by both the domestic (ANSI) and international (ISO) Healthcare Workforce Standards Committees.
- How Hard?** 40% - 70% projected profit increases are "low hanging fruit." Complete implementation will be done in 40-90 days with less than a man-week of company staff time. These Rapid High ROI products require little change management and little cost.
- What is This?** Correlative Big Data scientific impact analysis, predictive modeling and industry benchmarking of the only hospital workforce standards in the entire industry to all Hospital Value Based Purchasing revenue scores and the six sub scores as well as profit, labor costs, revenue recovery, workforce productivity and efficiency. We have discovered enormous amounts of hidden lost workforce productivity and premium labor costs than can be easily reduced through a few simple workflows and automations in existing workforce systems. We know factors and levels of workforce drivers which impact recovery of net revenue from major payers that can often be fixed within 6 months or less at low costs.
- Because this is new science, the full scope of tools and problems that we can fix is far beyond the scope of a single paragraph.
- How Much for the Products?** Our pricing varies for different HealthViZion product suites. The Rapid High ROI products are based on a projected 20% of the low end ROI plus one-time setup fees (20% discount for non-profits). The Collaborative Intelligence membership is \$15,000 per year for a single hospital with volume discounts for multiple hospitals plus setup fees. This comes with quarterly reports and a 90-minute consultation with HealthViZion analysts. The Leadership Management and Optimization solutions are based on number of employees. All products come with managed support.
- What Do You have to Do?** Assign IT personal to upload the required data to the standards using our mapping tools. In 30-days or less we will call you back to share the report and discuss areas of High ROI, low change management as well as areas of high risk and comparative Hospital Value Based Purchasing revenue scores.
