

People are always asking when is the best time and what product to treat their pets with to protect them against fleas, ticks and heartworm. Here is a quick breakdown of when to treat and which product will help protect your pet against pesky parasites!

WHEN

Spring	Use K9 Advantix for ticks, usually in April and May. Start Heartworm meds June 1 st
Summer	Stick with heartworm medication, and remember that fleas come out especially at the end of the summer
Fall	Continue to use Revolution until mosquitoes are gone, typically until October. Use K9 Advantix for ticks. You can use Revolution and K9 Advantix together, just give yourself one week between applying the two different products
Winter	Usually don't need anything
