Robotic Pool Cleaners

## Best-in-class professional cleaning

### Performance Driven Technology

The Dolphin Wave family of robotic pool cleaners offers a cleaning solution for every size commercial pool. Smaller pools, like those in many hotel or apartment complex environments, require the same care and attention as their larger counterparts. Dolphin has specifically engineered our line to include several options and price points that make them a perfect fit for these smaller commercial applications.

Commercial-grade, professional cleaners for all pool types, sizes and shapes.

Dolphin's commercial line of robotic cleaners feature heavy-duty cleaning performance, with robust reliability for long-term, cost-effective operation. Dolphin is the proven, professional solution for any commercial pool – from small public pools to even the largest commercial aquatics environments.

30 years of advanced robotic research and innovation stand behind every cleaner we make, ensuring comprehensive scanning of the entire pool and highly effective brushing and filtering throughout.

And by automating your pool cleaning, your staff is free to focus on other tasks while Dolphin delivers a sparkling clean pool and clear, healthy water.

#### Complete pool scanning

To ensure thorough cleaning, your Dolphin cleaner is equipped with built in software that systematically cleans your entire pool regardless of your pool's shape or surface.

#### Gyro XL scanning

Unique gyroscopic system delivers accurate and effective scanning for systematic cleaning along the entire pool.

#### CleverClean™ system

The unique CleverClean Scanning system, powered by intelligent software, helps the robot optimize its scanning capabilities by learning the various parameters of the pool and adjusting its patterns accordingly. This guarantees complete coverage of any type of pool during each cleaning cycle, including shaped pools and pools with obstacles.

#### Dual-filtration porosity options

Covers all pool conditions from rough debris to fine dust particles: Ultra-fine filter collects fine dust particles and net for leaves and rough debris.

#### Swivel cables

Dolphin's patented swivel cables eliminate tangled cables forever! As your Dolphin moves around the pool, its swivel ensures that the cable stays free and clear, allowing for complete pool coverage.
