COMPANY OVERVIEW

Bridges Academic Support Center is a company that is committed to the idea that every child is entitled to a quality education. When parents recognize that the education their children are receiving falls short of their expectations, they should have resources that have the capability and commitment to focus on the needs of their individual child. Bridges serves as a resource for families by assisting their children. Bridges offers academic support in mathematics and writing and focuses on students in grades 3 through 9; however, we routinely offer support to children outside of our focus area.

COMPANY PROFILE

Bridges Academic Support Center was created in 2016 in Vallejo California. It's founder and director has more than 20 years of teaching experience. Bridges Academic Support Center was developed as a means of providing wraparound academic support to students and their families and a response to four issues that the founder feels contribute to the undereducation of millions of children each year: classroom overcrowding, low teacher-expectations, inexperienced staff, and undeveloped partnerships with parents and caregivers.

DIFFERENTIATORS

At Bridges, we take pride in our commitment to the Whole Child approach to academic support. As professional educators, we know how important grades are – we also know that a child is much more important than any grade that she or he will ever earn.
