Naledzi Investment  
Holdings

Co Reg. No. 2014/093898/07

# Who we are

Naledzi Investment Holdings is a Johannesburg based level 1 black economic empowered company that was founded in 2014 to provide technology solutions that help our customers to reduce costs, improve efficiency while at the same time making a positive contribution to the local economy.

We deliver secure and sustainable solutions that include Information Communications Technology, Project Management, Renewable Energy, Digital Signature, etc. that help our customers to operate efficiently. We have recently expanded our portfolio to offer alluvial and quartz silica solutions to address current supply shortfalls in the market. We intend to add more solutions in areas where gaps between demand and supply can be identified and where there is a reasonable prospect for sustainable business operations.

## Naledzi Investment Holdings Alluvial & Quartz Silica

is a division of Naledzi Investment Holdings, that specializes in the processing of mined Silica, Olivine, Zircon and Chromite sand to supply glass making industries, foundry, ceramic tiles, golf courses, water treatment and related industries. We also provide Foundry cores and consulting services to foundries, as well as Laboratory equipment to the chemical and metallurgical industries together with independent laboratories servicing any industry.

# Mission

Our mission is to take advantage of the opportunities created by the rising demand in the construction, tile, water filtration, smelter industries as well as the expected recovery in foundries to provide quality products to help our customers deliver solutions to their end customers sustainably while helping develop and grow local industries to reduce poverty.

Our vision is to provide the best quality product to our customer base to help them improve efficiency and reduce costs while making a positive contribution to the development of local communities.

*We are guided by the following principles to deliver sustainable solutions: integrity, accountability, dependability*

---

*We are passionate about using the power of technology to deliver innovative solutions for a sustainable future!*

---

## **What We Do Best**

Our capabilities cover the entire lifecycle of a solution, starting with needs analysis to application development using the latest and most appropriate technologies followed by final implementation and integration to on-going maintenance and support of the deployed solution.

Naledzi Investment Holdings Alluvial & Quartz Silica specializes in the processing of mined Silica, Olivine, Zircon and Chromite sand to supply the glass making, foundry, ceramic tiles, golf courses, water treatment and related industries. We also provide Foundry cores and consulting services to foundries, as well as Laboratory equipment to the chemical and metallurgical industries together with independent laboratories servicing any industry. Our solutions include:

Our solutions include:

- IT Consulting services
- Network infrastructure services
- Network and Desktop support services
- Cloud Services
- Business Process Optimization
- Casting of large and intricate steel products
- Production of household tiling products
- Water treatment
- Road construction
- Smelting
- Glass manufacturing

# **ICT Solutions**

## **IT Consulting Services**

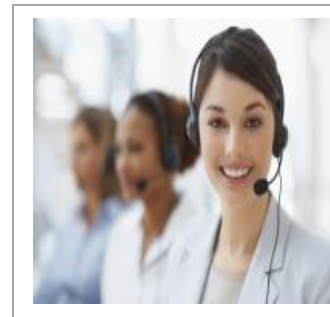

We have extensive experience of performing needs analysis and designing secure and innovative solutions that include wired and wireless networks running a variety of applications to help customers collaborate effectively.

## **Network Infrastructure services**

We partner with some of the leading global suppliers such as Cisco, Dell, HP, Microsoft, Symantec, etc. to design and deliver solutions that run critical applications. This includes the delivery of wired/wireless networks, server cluster, desktop or mobile devices, software applications, etc. that help improve customer efficiency to improve customer experience.

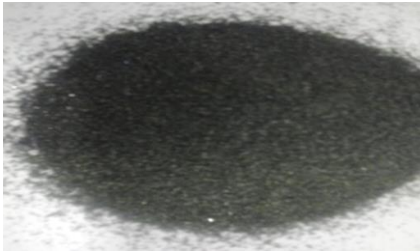

## **Business Process Optimization**

Our Business Process Optimization offering provides an excellent opportunity for those customers dealing with large volumes of transactions in operations that can be used to create employment opportunities in under developed areas. We offer a range of Business Process Optimization solutions running on hosted platforms to deliver 24x7 help desks, etc.

# Alluvial & Quartz Silica Solutions

## Chromite sand

We provide the best quality chromite sand sourced from the bushveld around Rustenburg. This provides the best chilling effect on large foundry casting and is ideal for applications that require high pouring temperatures

## Quartz Silica stones 13 to 50mm

Our quartz silica stones are produced in different sizes to suit the best applications in road construction, smelting, and water treatment.

## Crushed silica sand

We partner with some of the leading sand mining operations in Bronkhorstspuit, Rustenburg and Delmas to provide high quality crushed silica sand that is ideal for glass making, water treatment, ceramic tiles, and smelting operations around the country.

## Alluvial Silica sand

Our alluvial silica sand product is designed to address customer requirements in foundry and tile industries.

# Growth Opportunities

While our primary focus is the delivery of technology solutions, we intend to expand our portfolio into areas such as mining as well as the delivery of essential services such as healthcare that play a critical role in the development of local communities. The proposed expansion will be carried out in a phased manner in the next five years depending on the availability of capital.

---

*Growth opportunities for a sustainable future!*
