

Accelerated Learning Labs:

Closing the Gaps' Accelerated Learning Labs bring the same great, research-based learning programs offered in our Day Program and our Summer Enrichment Programs with the convenience of 1-2 hour learning blocks. It's perfect for after-school or home-school needs. We call this powerful approach Accelerated Learning Strategies -- a combination of educational programs that brings together 21st century, brain-based learning technologies with scientifically-validated, strategic instructional methodologies. The Accelerated Learning Labs offer convenient and affordable access to the remarkable benefits afforded by the Fast ForWord® Language & Reading products used in conjunction with The Listening Program®. We are proud to be the only center in South Florida providing this cutting-edge combination of learning therapies.

Fast ForWord® — computer-based training program proven to dramatically improve language, reading, and learning skills (attention, memory, focus) in just 4 - 8 weeks. Fast ForWord® not only strengthens, but significantly accelerates the cognitive skills used in learning and memory. It is beneficial to all children ranging in grades K-12. The program sharpens the brain's processing skills through the F.A.S.T. Power Learning Formula –

- Frequency and Intensity
- Adaptivity
- Simultaneous Development
- Timely Motivation

The program was designed by internationally renowned research scientists and is based on strict principles of neuroscience. Initially, the program works with basic language skills but quickly moves through increasingly challenging reading skills and comprehension.

The Listening Program®:

The Listening Program® is a Music-Based Auditory Stimulation™ method that is an affordable, effective approach for enabling individuals with a broad range of challenges and abilities to achieve even more. A unique auditory intervention program clinically proven to train the auditory system to more accurately process sounds enabling the brain to better receive, process, store, and utilize information

- It's through listening that we find a connection to learning.
- It's through learning that we find a connection to communication.

- It's through communication that we find a connection to life.
- Improve your listening.
- Improve your life.

Integrated Listening System®

ABT Bone Conduction Audio System™

EXPERIENCE the SOUND! Get more from The Listening Program®

The ABT Bone Conduction Audio System offers an integrated listening experience, which presents the music of The Listening Program (TLP) through the two natural sound conduction pathways for brain stimulation. You experience the music two ways; gentle vibrations through your body, (bone conduction) and through the headphones (air conduction). This multisensory approach accelerates and expands the benefits of The Listening Program method of music listening therapy for people of all ages and abilities.
