**Re: Ft Yuma Heath Care Center
Fire sprinkler fitter qualifications**

Gentlemen:

Below is my standard qualification for hiring an experienced fire sprinkler fitter

Experience – Must possess and demonstrate at least 3 years experience in the installation of wet pipe fire sprinkler systems. Work includes heavy lifting of at least 50lbs, climbing ladders, use of hand tools and specialty tools, measuring lengths of material to be machined by power equipment, able to read and interpret plans, understand building layout, pipe measurements, pipe and fitting sizes. Must be able to operate power threading machine, able to roll groove pipe.

License – must possess a current & valid driver's license, have reliable transportation with a clean DMV of at least 5 years.

Education – High school diploma or equivalent. Mathematics is used extensively.

Tools – must possess basic hand tools which include (not limited to): 18V (min) drill & impact driver; at least (2) pipe wrenches (one each must be 18" and 24"), tape measure (both metric & standard), pliers, adjustable "crescent" wrench (one at least 10/12"), complete ½" drive socket set, size from ½" to 1¼" deep sockets, open end wrenches, size 3/8" to 1¼", min 18oz hammer. All tools listed are every day. Must also have the required OSHA steel toe foot wear

If you have any questions, please feel free to contact me.

Thank you,

Robert Corbett
