

# HoverCam 3PO Web Camera

HoverCam 3PO is the world's first SuperSpeed USB 3.0 webcam with 8.0 MegaPixel resolution and 30 frames/sec speed over USB 3.0

It includes software for taking 8MP snapshots and recording full-motion no-lag HD video over USB directly to the computer. A microphone is included, along with a swivel mount for attaching it to a monitor.

Ideal for webconferencing, video conferencing and gaming where the highest video quality is desired.
