RE: Michael James Ross

Covelo Cutoff Collective is a Medical collective with over 100 patients. All patients have been recommended by their medical provider to consume cannabis. Not all patients have access to knowledge of plants nor the means to obtain it finically. We as a collective work together to provide those without and to teach and network within not only to preserve but enhance the homeopathic pathways of cannabis.

Dolores Maria Gonzalez Has Been a long time member since 2011. She has helped the collective and its members throughout her tenure as a journeyman propagator of holistic flowers often sharing her stock with collective members and vice versus.

We as a collective stand behind each and every member. When she was arrested back on 10-26-2015. the cannabis she was holding happened to be numerous patients only remuneration of the previous season being carried from the collective to the dispensary. On An Average of 1500 per lb. and over 865 lbs. destroy many, many patients were never able to recover nor recuperate from the loss.

A list of the patients name follows and a copy of their recommendation may be obtained from the Doctor.
