WEBDOCTORS™

for Employers

Provide your employees with
24/7 access to healthcare.

Your employees can now have unlimited access to affordable, quality healthcare through the convenience of **web, phone or mobile app**.

Within minutes, your employees can request a consult, talk to a doctor and have a prescription sent to their pharmacy of choice... all without leaving work.

Telehealth is the future of Healthcare Delivery.

The massive and historic shift in healthcare over the past decade has brought about significant changes to how healthcare is delivered. Telehealth solves the three biggest healthcare challenges: limited access, increased cost and inconsistent quality of care.

Experts have proven that telehealth is just as effective as in-person care, costs significantly less and produces high levels of patient satisfaction, without the need for a follow-up visit, as evidenced in several independent studies.

How WEBDOCTORS PLUS Works:

With WEBDOCTORS PLUS, getting better is as simple as …

- *Signing into your account:* Sign into your account, and schedule your appointment with your doctor.
- *Consulting with a doctor:* Talk with the doctor over phone, video consult, or through mobile app.
- *Picking up your prescriptions:* If medically necessary, your prescriptions can be sent to a pharmacy of your choice.

Our Network of **Doctors**:

At WEBDOCTORS PLUS, we do everything that we can in order to ensure the quality of the care provided through our services. This quality care would involve a strict qualification confirmation and assessment process for all of the doctors inside of our network.
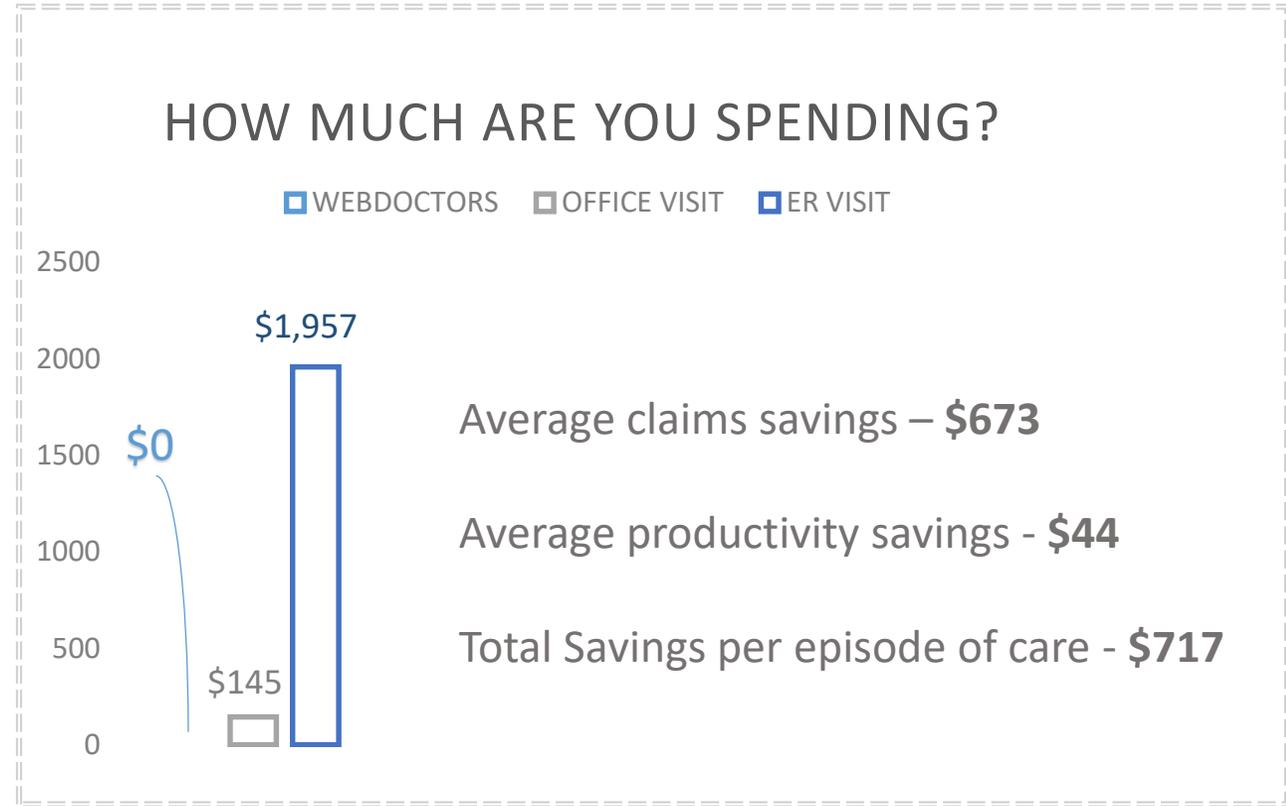

Our Network of Physicians are:

- Licensed in their respective states
- Covered by malpractice insurance for WEBDOCTORS PLUS consultations
- Over 1,800 network physicians
- Located in the United States

100% Guaranteed ROI with this proven formula:

❑ $0 Copay Plan Design – generates an ROI of 400%
❑ Internal support from within high-level management
❑ Customized strategically timed electronic outreach (text/email, etc.)
❑ Proactive personalized health risk assessment surveys, designed to identify health risk and provide treatment plan of care.
❑ Reward members for participating in health benefits, and for adherence to healthy behaviors recommended.

Total Savings per episode of care - **$717**

Invest in the health and wellness of your employees:

Our program allows your employees and their families to be able to access quality healthcare when and where they need it.

Besides the immediate return of not paying for costly medical bills and avoidable health crisis, our program allows your employees to be able to stay on top of their health and wellness. Our unique Preventive Health Labs allows you to reduce your employees health risks, increasing your ROI.

We can help you design your wellness program and save money on the process. We have the expertise and tools to convert your wellness program into a great solution.

Raising the Bar with Telemedicine:

WEBDOCTORS PLUS has released a new program that is filling a major void in the delivery of Telehealth Care entitled- HealthWatch™. HealthWatch™ tremendously enhances our 24/7 Virtual Care program by allowing our care team to monitor the health and wellness of our members by utilizing proprietary brief health and lifestyle assessments, and other data mining tools that populate key data in assisting our Care Team in providing early intervention, or encouraging good habits.

This program aids in the early detection of preventable health risk and disease; it educates our members; as well as directs them to either the appropriate telehealth care solution within our system or directs them to their primary care physician if necessary.

This program provides rewards for various levels of engagement in either our telehealth platform or health/wellness initiatives (assessments, labs, etc.). **We are the only telehealth provider that funds our own reward program.**
