Citizens Against Harmful Technologies is dedicated to those suffering physically, psychologically and economically because of technologies implemented in a harmful way against the people of the earth. We have all benefited from technology, but the good it can do is limited by the motivations of those who utilize it.

We do not limit our concern to those in our neighborhood, our state or our country. The broad scope of technology which has been implemented for warfare reaches out from political, educational and other man-made institutions everywhere. We are at a crossroads with modern technology that has a potential to destroy the earth and all living things. It has become obvious that the misuse of technology being used as weaponry to disable, torture and destroy humanity is out of control.

## WHERE IS YOUR VOICE?

What can we do to combat the evil that is being perpetrated throughout our world? We must unify for survival and when people are controlled by others to divide and conquer families, friends and neighbors with persistent surveillance, electronic assault and organized stalking, survival is in danger. Ghandi said:

Truth alone will endure, all the rest will be swept away before the tide of time. I must continue to bear testimony to truth even if I am forsaken by all. Mine may today be a voice in the wilderness, but it will be heard when all other voices are silenced, if it is the voice of Truth. Mahatma Gandhi

## UPCOMING EVENTS

Thank you to Cait Ryan, Karla Smith, Joy Mack and Norman Rabin for their ongoing monitoring of current legislation to help protect our rights against legalization of human experimentation.

Their conference call on Talkshoe is Tuesdays, at 7:30 PM EST, Call ID 139323#, 1# to deal with bioethics, NPRM. A notice of proposed rulemaking ("NPRM") is a public notice issued by law when one of the independent agencies of the United States government wishes to add, remove, or change a rule or regulation as part of the rule making process.

For instructions on submitting comments go to:

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Office of the Science Advisor announces two separate public meetings of the Human Studies Review Board to advise the Agency on the ethical and scientific reviews of EPA research with human subjects.

DATES: A public virtual meeting will be held on January 12–13, 2016, from 1:00 p.m. to approximately 5:00 p.m. Eastern Standard Time each day. A separate teleconference meeting is planned for Wednesday, March 30, 2016, from 1:00 p.m. to approximately 2:30 p.m. for the HSRB to finalize its Final Report of the January 12–13, 2016 meeting.

ADDRESSES: Both of these meetings will be conducted entirely on the Internet using Adobe Connect.

For detailed access information visit the HSRB Website:

## DONATIONS

CitizensAHT.org has three funds, (1) general donations, (2) emergency needs to assist TI's and (3) R&D product development for protective measures. Please donate generously to help get this organization off to a great start. As of this date, this organization does not have 501(c)3 non-profit status.

## MEMBERSHIPS

\$30 provides consultations based on technical research for effective protective measures, general support for TI's, networking, newsletters & educational materials. A company membership is \$100 per year.

Booklet: We provide a copy of the 44 page "What is a Targeted Individual?" with a donation or membership.

## LINQSTAT

We are placing an order for Linqstat (protection against EMF) this week which will be available through the e-Commerce button on the website. We provide this service to get you a better product than the Velostat which is available from LessEMF.com.

The following is a draft of our mission statement:

**Mission:** The purpose of the corporation is to (1) bring people together to protect themselves and future generations from harmful technology, (2) support victims of harmful technology and how it relates to their civil rights and their right to maintain their human autonomy, (3) educate and support refugees of war (where the war is overt, covert, declared or undeclared, or silent technological war), (3) educate and support persons who have been attacked or assaulted by human experimentation, covert organized stalking, unauthorized surgical procedures, implants and unlawful stimulation of implants, biological, chemical, nuclear and directed energy weapons, covert physical and electronic surveillance and harassment, psychological and mind control technology (including but not limited to head/brain implants, artificial intelligence, telepathy, medical telemetry), and (4) connect them with services and resources which can help them whether by literature, legal assistance, conference calls, conventions, social networks, videos, websites, professionals, universities, philanthropists, scientific studies, or any other means by which people can be brought together to benefit by exchange of services, advice, experiences, spiritual meetings and prayer, photographs, documents, billboards, public literature campaigns or legal demonstrations all of which are intended to be of non-violent and legal means which uphold (i) US Constitutional Rights and its amendments, (ii) International humanitarian rights, (iii) the Geneva Convention and (iv) the Nuremberg Code and its amendments.

---

May you be uplifted & empowered by the integrity and professionalism that CAHT will provide in the best interest of life, liberty & the pursuit of happiness for all people of the earth.

Sincerely,

Neal Chevrier

## BE CAREFUL WHAT YOU THINK, WHAT YOU SAY AND TO WHOM

This saying takes on a whole other meaning when you are under remote mind control. The old meaning was "to be open to new ideas." The new meaning is that "thoughts and feelings such as extreme anger may be induced in you by frequencies." In this case, your thoughts and feelings did not originate in your own mind and do not express your intent. Intention is most important when considered as a motive in criminal acts. This is important because people under mind control may be expressing the intentions of others who are placing frequency *controlled effects* on them and not their own.

Optimism is great, but when you are attacked with radio frequencies, you must be very careful what you say and to whom you say it. If you feel urged to try to convince someone that unseen forces are the cause of your discomfort, people who have been indoctrinated to attack you may try to give you a free mental health exam as a tool for separating you from society with a label of "mentally ill." Things will not work out well. You are a pawn in a game that is quickly engulfing the world populations with misused technology.

Without the truth, the public has no way of knowing the suffering going on behind the walls of your home. This is why it is essential that people learn the truth about electronic weapons. You must not be quiet but be careful with your words. Connect with other people who understand and share your experiences.

Use of the electromagnetic spectrum as a weapon is heating up the earth, destroying life in the oceans and the food supply. Misused technology may not kill the whole human race, but it will set it back in a catastrophic way. It is like diving into a treacherous underwater cave without a guide line to lead you back out.

Ordinary life has many ways of creating fear, worry, guilt, regret, sadness, envy, greed, hate and negative feelings, but when your life is eclipsed with technology which allows other people sitting at a computer clicking torture selections to control your mind and body, it is a whole new war. It is an opportunity to become a better person. Choose autonomy to believe your thoughts, not theirs. Be aware that not all thoughts, moods and feelings you have may not be your own. Stop and think before you react to angry thoughts. Fight the fine fight, lean on your higher power through prayer.

### WEBSITE REVIEW

Everyday, people are charged with crimes they didn't commit. From small infractions to rape and even murder, people are forced to defend themselves from these false allegations or face stiff penalties and even prison. People rarely, if ever, stop to consider the injustice currently

taking place within our justice system, regarding criminal and civil arenas and right down to traffic court, until they become a target/victim.

### BOOK REVIEW

Controlling the Human Mind by Dr. Nick Begich.

This is the century of the brain and the mind. The technologies that have advanced, under cover of secrecy and national security, now have the power to either enslave us or free us to our higher potentials. These technologies will impact our consciousness itself and, as a result, require an invigorated public debate in the light of day. At the same time, there is hope

and great possibility in these areas of science. The first part of this book deals with the sinister side of controlling the human mind with the second part exploring the possibilities that are emerging with new brain and mind enhancing technologies. The greatest threats and the greatest possibilities reside within the core of who we are and what happens in the center of our minds, the seat of our souls. This is the most important book yet released from the research efforts of Dr. Nick Begich.

## FOOD SUPPLY ENGINEERED TO DISAPPEAR

When you don't have any food to eat, having a voice in your ear will not be a priority. The dams which previously provided water and power for the western states have been shut down. Hoover Dam is dry and so are 6 other large dams. The main environmental hazards being used against us right now are chemtrails for weather manipulation causing drought for destruction of the food supply, pollution of the Pacific Ocean and contamination of the Gulf of Mexico which is killing the sea food supply. When the food supply has dwindled enough to cause wide-spread panic, it will be too late. While people are overwhelmed in their own self-interest, the world's food supply is also being engineered scientifically so that an induced famine will occur at a pre-determined time. This is not a possibility, it is a reality.

It will also be too late for TI's to get the main-stream media educated about electronic harassment and surveillance. Efforts need to be organized for TI's to unite, gather together and get the information to the public. Everyone is a target.

## Ex-CIA and MI5 Agent and Whistleblower Carl Clark Reveals Covert Electromagnetic Torture of Civilians by Intel Agencies in US/UK/Europe/Aids with Directed Energy Non-Lethal Neuroweapons

Interview with Carl Clark, Norfolk, England.

**Armin Gross:** Matters related to the secret services are usually not disclosed. You want to bring them out in the open though. Who did you work for?

**Carl Clark:** I worked freelance from 1980 to 2003 for various secret services. I worked for the American Central Intelligence Agency (CIA) up to 1997. I then worked for the Israeli Secret Services, Mossad and for the Anti-Defamation League (ADL), a US organisation against discrimination and defamation of Jews. I was also employed by MI 5, a subgroup of the British Secret Services. I later moved to the Police Secret Services as well as to the secret services of an investigation laboratory. I was deployed in European operations in Paris, Zurich, Berlin, Dusseldorf, Munich, Madrid, Bilbao and Moscow.

**Armin Gross:** What were your main assignments?

**Carl Clark:** An important assignment was to infiltrate certain groups to obtain inside information about them. I would join certain groups, make friends with some of the members and then proceed to ruin their lives.

**Armin Gross:** What kind of groups were they?

**Carl Clark:** First and foremost criminal gangs and drug cartels. I provided information about the National Front, Nazis or skinheads to Israeli Secret Services. What they were interested in were names, addresses, meeting places, projects and objectives. I tracked individual targets for the CIA.

### MICROWAVE WEAPONS

**Armin Gross:** Did you also use such weapons?

**Carl Clark:** No. I was responsible for surveillance. Colleagues from special departments did this. However, I was at times on site when these weapons were deployed.

**Armin Gross:** Can you describe in more detail how the deployment of weapons took place?

**Carl Clark:** It's a bit like what takes place in a science fiction movie. People can be tracked anywhere by radar, satellite, a base station and complimentary computer programs. For example, three radar devices would sometimes be positioned in the vicinity of the target. The radar emits electromagnetic waves, some of which pick up the target and the result is then evaluated. My friends who work in the special department could then follow the target all day on their computers. This form of localising the target made it easy to deploy the weapons accurately. My colleagues could see exactly where to aim and also observe how the target reacted.

**Armin Gross:** What effect did the weapons have on the targets?

**Carl Clark:** They create heat, inner burns, pain, nausea, fear. Sometimes traces are left on the skin, but mostly not. If the targets go to the doctor, they get told everything is OK. Take into account, this was the situation ten years ago. This technology has advanced considerably since then.

**Armin Gross:** What is the objective of such attacks?

**Carl Clark:** The aim is to intimidate certain people, for example people who make a lot of noise. I myself was under attack for three years after opting out. I'm virtually sure that weapons were used against me in 2003/2004 which provoked strong aggression. I almost killed somebody on two occasions, once a neighbour who was a pleasant elderly lady.

### ATTEMPTS TO DRIVE PEOPLE TO INSANITY

**Armin Gross:** Do you think it's possible to directly influence feelings by weaponising electromagnetic rays?

**Carl Clark:** Without doubt. We know that living organism is sensitive to electromagnetic radiation. Elementary life processes within cells function by biogenic electromagnetic oscillation. Frequencies from the exterior can damage or change these processes. There have already been far-reaching attempts at influencing body, mind and soul through frequencies within the framework of military research. It's possible to provoke fear, aggression, nervousness or forgetfulness in this way. In combination with other interventions, a target can be driven insane. For example, radiofrequency can be manipulated so that the target hears his own name on the radio or his computer shows his name time and again. Voices are also specifically transmitted to a target commenting on his activities. For example, I heard a voice in the morning after getting up which said "Get up and injure somebody".

**Armin Gross:** People are actually being driven to psychic extremes then?

**Carl Clark:** Yes, the undoubted goal is to have select people end up in psychiatric institutions. If a target seeks help by going to the police or to the doctor, they don't get taken seriously. Some doctors and hospitals actually work together with the Secret Services. Diagnostic directives permit a patient who feels persecuted or hears voices to be classified as schizophrenic.

**Armin Gross:** Hospitals cooperate with the Secret Services?

**Carl Clark:** Yes, certainly. Large companies too. That's why one lives dangerously if one carries out investigations on large companies. The American State protects large companies like MacDonald's, Coca-Cola and certain pharmaceutical enterprises. These companies also have FBI agents at their disposal for matters related to industrial espionage. The Freemasons who are widespread within the CIA also play a major role.

### ENORMOUS SURVEILLANCE NET

**Armin Gross:** Do you know in which countries individuals are under surveillance and are being assaulted by energy weapons?

**Carl Clark:** The USA, Germany, China, North Korea, Russia, France and England, normally without the official knowledge of the particular government. But unofficially, I believe that government personnel must be involved in some way or know something about the goings-on.

**Armin Gross:** Do you know how many people are under surveillance?

**Carl Clark:** There are about 5,000 in England under surveillance and about 15,000 overseeing the operation. Apart from the large Secret Service agencies, there are 300 or 400 minor Secret Service agencies which were formed by former policemen or former Secret Service agents. They have permission from the Home Office to spy, take photographs and procure information. Their employees are well paid.

**Armin Gross:** Was it a problem for you to switch from one Secret Service agency to another?

**Carl Clark:** No. It was always a positive move from my new employer's viewpoint as I could always provide information to him about my previous Secret Service agency. The large Secret Service agencies mistrust each other totally. I earned more money as a result.

### OPTING OUT

**Armin Gross:** Why did you opt out?

**Carl Clark:** I saw that what I was doing was wrong. The last two targets that were allocated to me had done nothing. They were not political, quite normal, nice people, not criminal or economically dangerous. The only reason I could come up with for them having been selected as targets was their DNA or their blood. There has recently been a lot of research done in this area. The DNA is associated with the finest details of our character. The Human Genomes Project between 1993 and 2004 analyzed all chemical base pairs which make up human DNA, also collecting the genetic data of people from isolated communities in danger of extinction (Human Genomes Diversity Project). The results were then all compared and correlated. Our employers were always very keen on DNA analyses of the people under surveillance. It was always one of our most important tasks in the initial period of surveillance to organize DNA or blood analyses of these individuals. make friends with some of the members and then proceed to ruin their lives.

**Armin Gross:** What kind of groups were they?

**Carl Clark:** First and foremost criminal gangs and drug cartels. I provided information about the National Front, Nazis or skinheads to Israeli Secret Services. What they were interested in were names, addresses, meeting places, projects and objectives. I tracked individual targets for the CIA.

## LATEST THREAT TO FREEDOMS

### CISA, Cybersecurity Information Sharing Act

CISA is a surveillance and incarceration bill which has been attached to the omnibus, a budget bill that has to be passed to prevent a government shutdown. It is a proposed law to "improve cybersecurity in the United States through enhanced sharing of information and for other purposes". The law would allow the sharing of Internet traffic information between the U.S. government and technology and manufacturing companies. The bill was introduced in the U.S. Senate on July 10, 2014, and passed in the Senate October 27, 2015. Opponents question CISA's value, believing it will move

responsibility from private business to the government, thereby increasing vulnerability of personal private information, as well as dispersing personal private information across seven government agencies, including the NSA and local police.

The text of the bill was incorporated by amendment into a consolidated spending bill in the U.S. House on December 15, 2015.

### WARNING: FFCCHS IS GATHERING INFORMATION ON TT'S

The recent request by Max Williams (Board Member for 7 yrs) for TT's to participate in yet another V2K study before his departure from FFCCHS in January, 2016, is evidence of data mining of targets. TT's should realize that they are providing data to government agents through their general survey and FFCCHS 800 info line and member data bases. Williams is a government employee. A document called "How to Spot a Spy" is a good description of people who take control of activists. They make sure that nothing is done and that people are divided so that no progress is made.

One way to neutralize a potential activist is to get them to be in a group that does all the wrong things. Why?

- 1) The message doesn't get out
- 2) A lot of time is wasted
- 3) The activist is frustrated and discouraged
- 4) Nothing good is accomplished. FBI and Police Informers and Infiltrators will infest any group and they have phony activist organizations established.

## IMPLANT TECHNOLOGY

Do stalkers point phones at you? Phones do not have to be pointed at you to talk to your implants or send the RFID and GPS data from the microchips in your body to a satellite. Within seconds, Directed Energy will be pointed at you to stimulate your implants. A brain implant provides a continuous connection through satellite to an Artificial Intelligence computer. To the right is an illustration of what a phone can do. It is the brains of an implant system called a Wireless Medical Body Area Network ("BAN"). It is intended that every citizen will have their medical information available to police, firemen, EVAC personnel and your local stalker! Please take note of this technology, it is the way the one world government plans to control the whole human race. It is already in operation for TT's. See the Implant page on our website for pictures of a BAN satellite network.
