

Stop Implantation of Wireless Body Sensor Networks

This is the new healthcare system which incorporates humans into the Internet of Things. Dozens of implants connect your brain, heart, lungs and other organs to an AI computer. Your every motion, your position in space, your thoughts and senses will be recorded by the government. There will be no more privacy. The Government will know when you use the bathroom or have sex. Do you want 20-200 implants in your body, in your children and grandchildren?

Did you ask for a smart meter to be put on your house?

You will not be asked if you want a Body Area Network!

A Very Low Power MAC (VLPM) Protocol for Wireless Body Area Networks (Fair Use Education)
Sensors 2011, 11(4), 3717-3737; <https://doi.org/10.3390/s110403717>

SOME IMPLANTS: There are many more:

RFID Implant: This is an implant that reports your personal identifying/medical information to an RFID reader.

EEG: These implants provide a continuous report of your brain waves. Why is this important? Subconscious thoughts can be put into your mind. You can be convinced you need to kill yourself. In a war, this would come in handy. Your enemy would kill *themselves*. Suicides have increased 30% in half the states in the US in the last 10 years.

Cochlear Implant: This implant provides a continuous report of what you are hearing. This radio can be used to speak to a person so that the sound goes directly into their brain. No one else can hear the sounds. The talking cannot be stopped.

Eye Implant: This implant provides a continuous report of what you are seeing.

Positioning Sensor (Accelerometer): This reports whether you are sitting, standing or laying down.

Motion Sensor: This reports what body part you are moving and how fast you are moving it.

Pressure Sensor: When this senses that pressure is being applied, it begins some type of vibration or heating to cause pain.

THE GANGSTALKING EPIDEMIC

You might say, “They can’t implant me, I won’t let them.” Think again. The government has planned for this. You will never know when you are implanted.

Military technologies are being used for which we have no defense, such as teleportation, invisibility and extreme stalking. Stalkers break into homes and cars and steal keys to everything. People are being implanted while in their own homes or hotels while they are sleeping. Some are implanted during a medical procedure in a clinic or hospital. Remember your brain can be influenced or controlled by someone beaming frequencies at your head. “They” put you to sleep and keep you asleep until they are done with their dirty work. “They” are using volunteer organizations including veterans, ex-medical personnel, ex-cops, ex-firemen and citizens assisting police for covert implantation and gangstalking. This is a US military operation using civilian soldiers in a covert black-op secret operation.

Targeted Individuals have already been implanted and are being illegally tracked and tortured like research animals. They have no recollection of being implanted. All human rights are taken away from them because they are no longer considered human. They are dehumanized as medical experiments – lab animals being used to test the BANs by at least 114 universities.

Have you seen people standing or sitting unnaturally still like statues or riding with backpacks on bikes or skateboards who are using their phones in an odd manner (all day)? They may be stalking, tracking and operating implants of Targeted Individuals, using mobile transmitters (mini cell towers in backpacks). **FCC rules state that only medical personnel are authorized to operate implants**, yet, thousands of young and old are being used as citizen torturers, even Jehovah’s Witnesses. Stalkers torture their victims with heat and vibration - damaging their cells with directed radiation. Microwave energy destroys living structures by heating them, which makes them leak out their contents and break down. Cell phones are the new torture and murder weapon. Energy can be directed using cell phones, satellites, drones, cell towers and transmitters. All of this activity is illegal, unconstitutional and a crime against humanity.

[Who are the people in your neighborhood operating the Body Area Network?](#)
