**FOR IMMEDIATE RELEASE**

**ITEM Media Hires Senior Technical Editor for *Interference Technology* Division**

**PLYMOUTH MEETING, PA; December 14, 2015** - ITEM Media, a digital media company, announced today that Kenneth Wyatt has joined the company as Senior Technical Editor for their *Interference Technology* division. In this newly created role, Kenneth will utilize his industry expertise to create and organize content that is focused on EMI (electromagnetic interference) and EMC (electromagnetic compatibility).

Kenneth holds degrees in biology and electronic engineering and has worked as a product development engineer for 10 years for various aerospace firms on projects ranging from DC-DC power converters to RF and microwave systems for shipboard and space platforms. For over 20 years, he worked as a senior EMC engineer for Hewlett-Packard and Agilent Technologies in Colorado Springs where he provided comprehensive EMC design and troubleshooting services. During that time, he developed and provided advanced EMC training and corporate leadership for EMC.

“I am excited that Ken is joining our team,” said Graham Kilshaw, Chief Media Officer of ITEM Media. “His continuous, hands-on experience in the industry brings a level of knowledge to the team that will allow us to really dig deep into the EMI/EMC field. Our mission at ITEM Media is to provide practical information and solutions that engineers can use, and with Ken on board, we’ll gain a higher level of understanding regarding current developments and needs in the industry.”

A prolific author and presenter, Kenneth is not one to sit still. He recently coauthored the book with Patrick André, “EMI Troubleshooting Cookbook for Product Designers” and has been published in numerous industry magazines. As EMI troubleshooting is his specialty, he also co-authored the popular “EMC Pocket Guide” and manages the “EMC Troubleshooter’s” group on LinkedIn. He is also a senior member of the IEEE and a long time member of the EMC Society. His comprehensive, yet practical, EMC design, measurement and troubleshooting seminars have been presented across the U.S., Europe and Asia.

“I look forward to working with Ken on a daily basis to achieve our goal of providing even more practical EMI/EMC information to engineers. His expertise will allow us to expand and grow our *Interference Technology* brand, which has been the backbone of the company since 1970,” said Kilshaw.

## **About ITEM Media**

ITEM Media is a digital media company whose titles include *Interference Technology*, *Electronics Cooling*, and *Environmental Test & Design*. Based in suburban Philadelphia with teams in China and Japan, the company disseminates information that is geared towards electrical and mechanical engineers world-wide. Started in 1970, the company has shifted focus from print to digital in recent years, and has expanded its brands with the addition of live events in 2014, including *EMC Live* and *Thermal Live*.
