## About Ironbark Citrus

Ironbark Citrus is an Australian family owned and operated business, established in 1990 by Susan and Allen Jenkin. Located in the regional town of Mundubbera, Queensland, the orchard area spans over three farms and produces approximately 5000 tonnes of premium Australian mandarins for export around the world each year.

### Nova

Best described as being big, juicy and sweet! The Nova is a medium large sized, round shaped, orange coloured variety. It has smooth skin and is easy to peel. It has a pleasant flavor, contains few seeds, and is very juicy. It is excellent for cooking, juicing, and fresh.

Harvest begins in Week 2 in April.

### Fremont

Known for it's intense flavour & vibrant colour. The Fremont is a medium sized, flat/oval shaped, rich red orange coloured variety. It has smooth, easy to peel skin, some seeds, and a very intense sweet flavor. It is excellent for cooking, juicing, and fresh.

Harvest begins in Week 2 in April.

### Sunset Sweet

Known for it's intense flavour and vibrant colour. The Sunset Sweet is a medium sized, flat/oval shaped, rich red/orange coloured variety, related to the Fremont mandarin. It has smooth, easy to peel skin, some seeds, and a very intense sweet flavor. It is excellent for both juicing and fresh.

Harvest begins in Week 2 in April

### Sunburst

Best described as being juicy and refreshing. The Sunburst is a medium - large sized, oval shaped variety, with a deep coral red/orange colour. It is sweet and highly flavoured, with some seeds. The skin is extremely smooth, shiny and easy to peel. Harvest begins in Week 4 in May.

### Royal Honey Murcott

Our very own premium mandarin which can only be described as simply the best! This exciting variety has been bred on our own farms in Queensland, Australia. The Royal Honey is a medium to large sized, flat/oval shaped, rich red/orange coloured variety, related to the traditional Honey Murcott Mandarin. It has a smooth, easy to peel skin, few to no seeds, and a very rich, sweet flavour, with very low acid levels and high juice content. It is a favourite for fresh consumption. Harvest begins in Week 3 in May.

### Low Seed Honey Murcott

As it's name states, it's best feature being a low seed variety. The Low Seed Honey Murcott is a medium/large sized, flat/oval shaped, orange coloured variety. It has a thin, smooth skin, and has very few seeds. It has a rich, sweet, honey-like flavour. It ships and stores well. Harvest begins in Week 1 in July.

### Honey Murcott

The world's all time favourite mandarin variety! The Honey Murcott is a medium sized, flat/oval shaped, rich orange coloured variety. It has smooth, easy to peel skin, some seeds, and a very intense sweet flavor. Harvest begins in Week 2 in July

**All of our mandarin varieties ship and store extremely well!**
