

Real ID - Minnesota driver's license.

As you may be aware, our state (Minnesota) does not have Real ID compliant licenses yet (it begins October 2018), but our current Minnesota licenses have just been awarded another extension (to be used on all domestic flights) until October 2020. What this means, is that a passport or passport card **WILL NOT** be required to participate on a domestic Aim trip for 2019 (as stated in the information packets on the website). A valid driver's license or some other form of government-issued ID is all that is required to board a domestic flight. If a student does not have a government-issued driver's license, a learner's permit, passport or passport card, a certified birth certificate **IS REQUIRED** to participate on a domestic Aim trip. A certified birth certificate is one with a raised seal.
