

Kitty & Doggy Care Harness Fitting Instructions

1

1. First loosen all the straps

and pull the 2 main straps down around the leg tubes.

Pull just far enough down so that the tops of the leg tubes are exposed.

1

2

2. Now while holding your pet's 2 front legs lean over your pet and slide their 2 front legs into the leg tubes.

3

3. Next lift the 2 main straps and raise the harness tight against the chest. Use the extension as needed.

4

4. Now while holding the 2 main straps up Insert your right thumb into the loop on the left main strap.

5

5. Next pull the thumb loop very tight over the shoulders while stretching the right main strap over the left main strap to engage the velcro.

6

6. Now secure the collar leaving slack enough for at least 2 fingers and place the handle over the main straps and collar on center.

7

7. Lastly strap the handle to the collar and engage the buckles using the chrome D ring to pull tight.

Disclaimer: This harness is only for the use of pets that meet our sizing requirements and is not intended for any other use. Please keep away from children and never leave pets unattended when using. Always use care and caution and monitor your pet's behavior and stress level.
