VISION ACCOMPLISHED
VISION ACCOMPLISHED

Hawke is at the forefront of optical performance with class-leading innovation and design.

Accuracy, strength and precision: our optics blend iconic design, exceptional engineering and unrivalled craftsmanship to create an unforgettable viewing experience.

RIFLESCOPES

Innovative designs for long range shooting.  p.8

ENDURANCE
Designed to make hunters more successful.  p.20

VANTAGE
Affordable performance exceeding expectations.  p.28

SIDEWINDER
Long range shooting has a new standard.  p.44

AIRMAX
Built for airgunners.  p.54
Our flagship riflescopes feature a selection of First Focal Plane (FFP) and Second Focal Plane (SFP) optical systems, designed to give shooters ultimate flexibility in the field.

The index matched lenses set the Frontier apart from its rivals. Exceptional clarity throughout the field of view, together with crisp image transmission ensure an unsurpassed viewing experience. The optical system with its wide magnification range, provides increased flexibility when transitioning between close and long range shooting.

The 30mm mono-tube chassis, machined from high grade aluminium, comes with two turret styles. Zero-stop turrets are resettable, lockable and feature a state of the art return to zero feature. They are exposed giving ease of access and offer a tactical design. The low-profile, capped turrets provide accurate and precise adjustments, while still retaining a compact and efficient design securely hidden beneath low-profile dust caps.

First Focal Plane (FFP) models ensure your holdover aim points stay true no matter what magnification you are using. When the magnification is increased, the reticle increases in size along with the image you are looking at. Using a combination of FFP optics, mil spaced reticles and 1/10 MRAD turrets Hawke have made adjustment effortless on all magnifications.

The FFP Mil Pro reticle is a mil spaced reticle with half mil spaced markings extending out to 10 mil of holdover.

Second Focal Plane models include the all new Mil Pro reticle which uses true mil spacing at 10× on the 2.5-15×50 model and 20× on the 4-24×50 and 5-30×56 models and is designed with half mil indicators and multiple aim points. The LR Dot reticle has been designed around the ballistic profile of common hunting cartridges. The Tactical Dot features a quick acquisition circle and central aim point. We have also introduced an L4A reticle and Battue reticle, ideal for driven hunt.
Precise Side Focus adjustment to infinity ensures accuracy is always maintained. The rheostat operates brightness settings for the red reticle illumination.

Set it and forget it. Quickly achieve sharp reticle focus and then lock it down to avoid accidentally adjusting the dioptre setting.

Highly accurate matched turrets feature a value of ½ MOA per click with a total 40 MOA for each revolution. Once zeroed the turrets can be reset.

Zero-Stop turrets that are push-pull locking and resettable give two full rotations of dialing ability. Available with ½ MRAD or ¼ MOA click values.

Throughout the optical system, all glass surfaces have received 21 layers of advanced coatings for high light transmission in all conditions.

All models are supplied with a removable zoom lever for fast and precise adjustment of your riflescope magnification with minimum effort.
FRONTIER FFP
First Focal Plane | 30mm | Side Focus | Illumination

FEATURES
First Focal Plane optical system
21 layer Fully Multi-Coated 5× ratio optical system
Side Focus control for parallax adjustment to infinity
30mm mono-tube chassis for superior strength
Long eye relief for high recoil and magnum calibres
Glass etched reticle with red illumination
6 levels of brightness with off positions in-between
⅛ MRAD exposed and locking, zero-stop turrets
Zoom ring with thumb lever and locking ocular
Nitrogen purged – water, shock and fog proof
Hawke lifetime warranty

FRONTIER RETICLES

**FFP MIL PRO**

Designed specifically for FFP optical systems. Based around a mil spaced reticle with half mil markings extending out to 10 mil of holdover.

**BATTUE**

Designed specifically to help fast target acquisition during Battue and driven hunt. Features a bright red centre dot and illuminated circle for instant aim.

**MIL PRO (10×)**

Glass etched with illuminated aim points. Based on a 10x mil dot spacing, the Mil Pro features additional windage and holdover marks for long range shooting.

**MIL PRO (20×)**

True mil spacing at 20x magnification. Features markings at half mil spacing and more accurate quarter mil spacing in the centre.

**LR DOT (8×)**

Designed for hunting, the LR Dot (8×) is a clean and simple reticle with extra holdover aim points that match the .30 calibre family centrefire ballistics.

**LR DOT (16×)**

The LR Dot (16×) shares the design style and characteristics of the LR Dot (8×), but is twice the size, so works better on higher magnification.
**TACTICAL DOT (6×)**

Glass etched with illuminated quick acquisition circle and central aim point. Additional aim points down to 10 mil spacing when on 6× magnification.

**L4A DOT**

A variant of the classic L4 reticle design, the L4A Dot uses a more open outer post design to keep more of the target visible while aiming.

**ADDITIONAL INFORMATION**

Additional dots in the lower section of the reticle give combined holdover and windage compensation aim points. The dots are located alongside each mil of holdover and are half mil spaced horizontally. Etched numbers make for easy reference.

All aim points on the main reticle pattern have hollowed gaps allowing for bullet on bullet precision.

**ADDITIONAL INFORMATION**

Created with First Focal Plane optical systems in mind, the FFP Mil Pro reticles ensure the reticle is bold enough to be seen on low magnification and fine enough to not obscure your target on high magnification.

Aim points are created with hollowed gaps to ensure the target is always visible. 4-20× and 5-25× models have additional ¼ mil aim points on the centre section of the reticle to give even greater precision.

Hunting is serious business. If your optics haven’t been specifically designed with hunting in mind, can you trust them when the time comes to take the shot? The Endurance line of scopes feature chassis and reticle designs that have been explicitly engineered for everything from varmint to big game hunting.

Our brand new Wide Angle optical system boasts a stunning field of view aimed to give you the best sight possible, while keeping an important 4 inch/102mm eye relief. Built into a 30mm chassis the Wide Angle optics are available in either fixed 100 yard/91 metre parallax or side focus models. All 30mm models feature a specialist erector system, maximizing internal stability.

The Endurance family also showcases unique ballistic reticle designs. The new LRC reticle provides aim points to match centrefire ballistics, simply choose the magnification to suit your cartridge. The Marksman reticle takes advantage of the shared ballistic profile of the popular .223 and .308 varmint and big game rounds to deliver out-of-the-box accuracy with aim points out to 700 yards/640 metres. If metric measurements are preferred, simply reduce the magnification to suit.
Precise Side Focus adjustment to infinity ensures accuracy is maintained. The rheostat operates brightness settings for the red reticle illumination.

Low profile ‘no-snag’ fingertip turrets with caps are precision engineered to deliver consistent and repeatable ¼ MOA click adjustments.

Wider than ever before, the Endurance Wide Angle optical system creates a breathtaking image that gives full edge to edge clarity. Seeing is believing.

Push-pull locking and resettable turrets with positive clicks. Two variants – ¼ MOA with 15 MOA per revolution or ¼ MRAD with 6 MRAD per revolution.

The apparent field of view is complemented further by a fine outer ocular assembly, making the enlarged target image almost float in front of your eye.

The rheostat operates reticle illumination in red. A multi stage brightness control allows a range of settings to suit shooting from dawn until dusk.

ENDURANCE RETICLES

.223/.308 MARKSMAN (RED)

Matches the ballistics of most .223 and .308 ammo. Crosses at 100 yard intervals out to 600 yards with 50 yard dots.

LR DOT (8×) (RED)

Designed for hunting, the LR Dot (8×) is a clean and simple reticle with extra holdover aim points that match the .30 calibre family centrefire ballistics.

LR DOT (16×) (RED)

The LR Dot (16×) shares the design style and characteristics of the LR Dot (8×), but is twice the size, so works better on higher magnification.

L4A DOT (RED)

A variant of the classic L4 reticle design, the L4A Dot uses a more open outer post design to keep more of the target visible while aiming.

LRC (RED)

Aim points to match centrefire. Choose the mag. for your cartridge. 200 yard zero and 100 yard intervals out to 500 yards.

TACTICAL DOT (4×) (RED)

Glass etched with illuminated quick acquisition circle and central aim point. Additional aim points down to 10 mil spacing when on 4× magnification.

VANTAGE

SIMPLICITY IS UDERATED. SOMETIMES THERE IS NO NEED FOR BELLS AND WHISTLES. WHEN YOU NEED A SOLID PRODUCT TO DO THE JOB YOU CAN RELY ON VANTAGE SCOPES TO DELIVER TIME AFTER TIME.

Vantage brings functionality and performance in the field without cutting corners on the things that matter.

Selected models feature parallax adjustment. Adjustable Objective (AO) models allow you to correct parallax error by rotating the front lens assembly. Side Focus (SF) models have the parallax adjustment positioned within easy reach on the saddle.

Available illuminated or non-illuminated, Vantage scopes feature a mono-tube chassis to provide stability and durability even with magnum recoil.

The all new Vantage 30 Wide Angle Side Focus models add a strong, feature rich scope that doesn’t break the bank. Built on a 30mm mono-tube chassis and with a side focus control and locking turrets, the Vantage 30 WA SF make quality and accuracy more affordable than ever before.

Vantage 30 Wide Angle models are an affordable and reliable selection for mid to long range hunting. The 30mm mono-tube chassis and fixed parallax at 100 yards/91 metres make this riflescope a no-nonsense addition, perfect for small bore and centrefire rifles.

A wide selection of reticles including Mil Dots, L4A red dots, 30/30 Duplex and calibre specific reticles, make the Vantage series a versatile tool, tailored to all types of shooting.

Versatile, affordable, exceptional. Vantage from Hawke is redefining value in optics.
Every Vantage IR model features dual red and green illumination with 5 brightness settings, allowing reticle visibility to be maximized in dark cover and brush.

Smooth and precise, Side Focus scopes adjust from close range to infinity ensuring parallax free focus is always maintained.

Easy magnification adjustment which doesn’t shift under heavy recoil thanks to the high torque setup. Ergonomically designed to be smooth yet solid.
VANTAGE 30 WA SF IR
30mm | Wide Angle | Side Focus | Illumination

FEATURES
Wide Angle optical system
11 layer Fully Multi-Coated optics for excellent clarity
Side Focus control for parallax adjustment to infinity
30mm mono-tube chassis for superior strength
Glass etched reticle with red and green illumination
Rheostat on saddle offers 5 levels of brightness
\( \frac{1}{10} \) MRAD exposed and locking turrets
Fast focus eyepiece and high torque zoom ring
Nitrogen purged – water, shock and fog proof
Hawke lifetime warranty

VANTAGE RETICLES

**RIMFIRE .22 LR HV**

Designed for the .22 LR HV calibre. Zero on maximum mag. at 50 yards and all aim points are pre-calculated.

**RIMFIRE .17 HMR**

Designed for the .17 HMR calibre. Zero on maximum mag. at 100 yards and all aim points are pre-calculated.

**RIMFIRE .22 LR SUBSONIC**

Designed for the .22 LR Subsonic calibre. Zero on maximum mag. at 50 yards and all aim points are pre-calculated.

**RIMFIRE .22 WMR**

Designed for the .22 WMR calibre. Zero on maximum mag. at 100 yards and all aim points are pre-calculated.

**L4A DOT**

A variant of the classic L4 reticle design, the L4A Dot uses a more open outer post design to keep more of the target visible while aiming.

**10× HALF MIL DOT**

Accurate mil spacing on 10×. Features dots and ties at half mil spacing, ensuring that there is always an aim point available. Glass etched fully floating design.
**MIL DOT IR (RED/GREEN)**

Multiple aim points for hold over and hold under, allowing compensation for long and close range shots. Illumination keeps the reticle visible in dark cover.

**30/30 CENTRE CROSS (RED/GREEN)**

A variant on the classic 30/30 Duplex reticle, the 30/30 Centre Cross offers 30 inch spacing from post to post at 100 yards, when on 4× magnification.

**30/30 DUPLEX**

Distance can be measured using the fine crosshairs, they represent an area of 30 inches across on 4× mag. at 100 yards. Great in most hunting situations.

**HALF MIL DOT**

Designed to be exact at 10×. Multiple aim points for hold over and hold under. Between each dot is a dash for more choice when selecting an aim point.

**MIL DOT**

The classic Mil Dot features multiple aim points for hold over and hold under, allowing you to compensate for long and close range shots.

Hawke products are covered and/or licensed by one or more registered designs, patents or are patent pending – visit www.hawkeoptics.com/ip
Long-range shooting has a very specific set of requirements when it comes to optics. The Sidewinder series of scopes deliver performance and features at an almost unbelievable value.

A 30mm mono-tube chassis provides a strong, stable platform for the optics, even when used on brutal long range calibres like the .338 Lapua. Exposed turrets allow for quick, yet precise adjustments, and a variety of magnifications mean no matter what your application or preference, Sidewinder has your long range shooting applications covered.

The Sidewinder ED range has been designed with patented interchangeable turrets and Extra-low Dispersion (ED) glass. Now supplied with ¼ MOA, ¼ MOA and ¼ MRAD turrets, all preferences are covered by this innovative new design from Hawke. The Sidewinder ED features the TMX reticle designed for ultra long-range shooting.

The all new Sidewinder FFP models introduce a new range of scopes within the Sidewinder family. Still with the same robust chassis and incredible optics, but now with a First Focal Plane optical system to suit your requirements. FFP scopes see their reticle increase in size with magnification, so your aim points are always correct. Sidewinder FFP models have a new mil spaced reticle, the FFP Mil, designed to suit the first focal plane optics within.

The Sidewinder 30 SF family offers three reticle options; two being different sizes of the popular Half Mil Dot reticle, the third being the SR Pro.
FULLY MULTI-COATED LENSES

18 layer advanced lens coatings are used on each lens throughout the optical system increasing light transmission and improving performance.

EXPOSED, LOCKING & RESETTABLE TURRETS

Push-pull exposed, locking and resettable turrets with positive ¼ MOA click values. First Focal Plane (FFP) models feature ⅛ MRAD turrets.

SIDE FOCUS AND ILLUMINATION RHEOSTAT

42mm models feature a 2 inch (50mm) side wheel. Other scopes are supplied with a 4 inch (100mm) wheel. The rheostat has 5 settings in red and green.

STEPLESS ILLUMINATION RHEOSTAT (ED MODEL)

Precise control of the reticle illumination using the stepless rheostat positioned at 45° on the ocular. Levels have been calibrated from bright to ultra-low.

LOCKING FAST FOCUS OCULAR

Set it and forget it. Quickly achieve sharp reticle focus and then lock it down to avoid accidentally adjusting the dioptre setting.

INTERCHANGEABLE TURRETS (ED MODEL)

Interchangeable, exposed, locking and resettable turrets allow for quick, yet precise adjustments. ¼ MOA, ½ MOA and ⅛ MRAD turrets supplied.
**SIDEWINDER ED**

ED Glass | 30mm | Side Focus | Illumination

**FEATURES**

- Extra-low Dispersion glass for optimum detail
- 18 layer Fully Multi-Coated optics for superior clarity
- Side Focus control for parallax adjustment to infinity
- 30mm mono-tube chassis for superior strength
- Glass etched reticle with red illumination
- Stepless rheostat offers total brightness control
- Interchangeable turrets – quick to install and remove
- ¼ MOA, ½ MOA & ⅛ MRAD exposed and locking turrets
- High torque zoom ring and locking ocular
- Nitrogen purged – water, shock and fog proof
- Hawke lifetime warranty

### ¼ MOA INTERCHANGEABLE TURRETS

1 click = ¼ MOA = ¼ inch at 100 yards.

Supplied as fitted on Sidewinder ED models. The ¼ MOA turrets offer familiar click adjustment to shooters, while still giving fast, accurate point of impact adjustment.

“I am lucky enough to live my life in the outdoors both professionally and what I do in my spare time. I only trust Hawke for all my optics needs.”

Blaine Anthony // Host of The Bear Whisperer
SIDEWINDER RETICLES

**TMX**
Glass etched with illuminated aim points. Based on a 20× mil dot spacing the TMX features additional windage and hold-over marks for long range shooting.

**SR PRO**
The SR Pro features hollow posts, thinned down crosses and additional windage points. The bars and dots can also be used for range finding.

**10× HALF MIL DOT**
Accurate mil spacing on 10×. Features dots and ties at half mil spacing, ensuring that there is always an aim point available. Glass etched fully floating reticle.

**20× HALF MIL DOT**
True mil spacing at 20× magnification. The hollow bars are calibrated for 0.2 mil spacing and mil spacing. Fully floating glass etched reticle with red/green illumination.

**FFP MIL**
Designed specifically for FFP optical systems. Based around a mil spaced reticle with half mil markings spaced beyond 5 mil in all directions.

Airguns can have a devastating effect on optics if the right products aren’t used. Hawke is an industry leader in developing specialised optics for serious airgun shooters and hunters.

Airmax scopes are available in either 30mm or 1 inch chassis designs. Featuring the AMX reticle, which is based on mil spacing, the Airmax series have holdover and windage aim points perfect for pellet trajectories.

All 30mm tube models have Side Focus parallax adjustment that can focus down to 10 yards/9 metres and have additional Side Focus wheels supplied in the box. Illuminated reticles maximize visibility in dark cover and brush.

The new Airmax 30 SF Compact incorporate a shorter optical system, making them ideal for bull pup and forward loading air rifles.

The Airmax 1 inch family has three magnification ranges to suit the needs of almost any shooter. Built with an Adjustable Objective chassis, the Airmax 1 inch models use a non-illuminated AMX reticle to improve downrange accuracy of any airgun shooter. A more traditional scope design, the Airmax 1 inch models are a great option for hunters that wants to keep the weight of their rifle down.
Precise Side Focus adjustment to infinity ensures accuracy is always maintained. The rheostat operates brightness settings for the red reticle illumination.

High grip elevation and windage turrets with ¼ MOA clicks. The locking mechanism ensures that zero is not lost by accidental movement.

Airmax optical systems have been expertly designed to offer high resolution viewing. Image reproduction is bright and sharp allowing you to see with total clarity.

With 15 MOA of adjustment for each rotation, the low-profile turrets operate with repeatable accuracy. Once on target the scale can be reset to zero.

Target style turrets that show which rotation you are on help give clear and precise adjustment. Supplied with caps to prevent accidental damage.

For accurate focus and the elimination of parallax error to infinity, the integrated Adjustable Objective (AO models) operates with precision and ease.
AIRMAX 30 SF
30mm | Side Focus | Illumination

FEATURES

- 16 layer Fully Multi-Coated optics for exceptional clarity
- Side Focus control for parallax adjustment to infinity
- 30mm mono-tube chassis for superior strength
- Glass etched reticle with red illumination
- Stepless rheostat offers total brightness control
- ¼ MOA exposed, locking and resettable turrets
- Fast focus eyebell and high torque zoom ring
- Includes screw-in metal flip-up covers
- Nitrogen purged – water, shock and fog proof
- Hawke lifetime warranty

AIRMAX RETICLES

AMX IR

Provides multiple aim points based on mil spacing, with additional half mil spacing for holdover aim points. All aim points and windage bars illuminate.

AMX

1 inch models feature the AMX reticle and provide multiple aim points based on mil spacing, additional half mil spacing provides holdover aim points.

ADDITIONAL INFORMATION

Both the AMX and AMX IR glass etched reticles are based on the spacing of a 10× mil dot. The AMX offers multiple aim points, useful when shooting air guns with loopy trajectories.

Half mil dot spacing on the lower post provides increased aim points for long shots. The horizontal bars are positioned half way between each mil dot spacing. Hollow posts are segmented into mil spacing and can be used for bracketing.

CROSSBOW OPTICS

As the leader in crossbow optics since 2008, Hawke has re-written the rules for what can be expected with crossbow scopes and accessories.

From a chassis specifically designed to withstand the rigours of crossbows, to reticle systems almost guaranteed to make you a better shot, each and every model is innovative, accurate and reliable.

The XB30 Pro, XB30 Compacts and XB1 scopes make the most of innovative reticle designs with aim points out to 100 yards/91 metres. The reticle is paired to our vari-speed technology allowing any bow speed to be dialled in to create unsurpassed accuracy. Using the magnification as a calibration tool, shooters can achieve even 10 yard/9 metre increments on virtually any bow shooting up to 475 feet per second (model dependant).

XB30 Compacts feature a Wide Angle optical system designed to give users the maximum view possible, a locking speed adjuster ring (patent pending) ensures the FPS setting is not changed once zeroed. XB30 Compacts feature a multi-line reticle with aim points out to 100 yards/91 metres incorporating windage bars. The two new models stretch the available magnification to 6× and 8× on the highest FPS setting.

The 3×32 illuminated reticle is now re-calibrated to 340 feet per second to better reflect the faster generation of crossbows now available. The reticle also features a range finding bracket system allowing distances to the deer to be easily calculated. Illuminated in red and green the scope is a reliable optic, performing well on all crossbows.
The XB30 Pro optical system produces exceptional low light performance thanks to its high light transmission 16 layer Fully Multi-Coated lenses.

Highly accurate, ½ MOA click, low profile resettable turrets with 30 MOA per revolution. The stepless rheostat allows for infinite illumination adjustment.

Adjust the speed selector (zoom) to match the bow speed up to 425 fps or 450 fps for accurate reticle calibration. XB30 Pro adjuster has a rubber insert.

A 36mm objective lens coupled with a Wide Angle optical system ensure the XB30 Compacts have the widest view possible without sacrificing clarity.

Quick and accurate zero is achieved with positive click ½ MOA turrets that are protected from the elements with a sealed turret cap.
XB30 PRO
30mm | Illumination

FEATURES
16 layer Fully Multi-Coated optics for exceptional clarity
30mm mono-tube chassis for superior strength
Speed adjuster ring – 215 fps to 450 fps
Fixed parallax distance of 50 yards / 46 metres
Glass etched reticle with red illumination
Stepless rheostat offers total brightness control
½ MOA low-profile ‘no-snag’ fingertip turrets
Fast focus eyebell and high torque zoom ring
Includes screw-in metal flip-up lens covers
Nitrogen purged – water, shock and fog proof
Hawke lifetime warranty

XB SR
CROSSBOW RETICLES

**XB30 PRO SR**

Aim points from 20 to 100 yards with a 2.5 inch centre cross and 1.5 inch cross at distances out to 60 yards. 4 inch bracketing markings out to 60 yards. 215 fps to 450 fps.

**XB30 COMPACT SR**

Aim points from 20 to 100 yards with 5 yard marks. 10 yard aim points incorporate windage bars and dots to compensate for 10mph and 20mph cross winds. 250 fps to 450/475 fps.

**XB1 SR**

20 yard zero with 10 yard aim points out to 100 yards. 1.5 inch aim marks at corresponding distances. Bracketing of 4 or 8 inches from 20 to 60 yards. 250 fps to 425 fps.

**XB SR**

20 yard zero with 10 yard aim points out to 70 yards. Bracketing system measures 17 inches – typical whitetail deer from top of back to brisket. Calibrated for speeds of 340 fps.

Hawke products are covered and/or licensed by one or more registered designs, patents or are patent pending – visit www.hawkeoptics.com/ip.
Whether being used for target or hunting situations, red dots and lasers are growing in popularity and Hawke has your needs covered with a variety of products to fit virtually any application.

Offering both tube style and reflex style red dot sights, Hawke has the red dot for you. For your hunting rifle (driven hunt/wild boar), AR, shotgun, target pistol or airgun, there is a red dot to fit.

An all new selection from Hawke, the Vantage red dot sights offer three different size options and Weaver/Picatinny or 9-11mm Dovetail rail fittings.

With five different models of reflex sight to choose between, Hawke have the reflex sight to suit any application. A range offering both standard and wide-view models and digital or auto-brightness control, with huge resistance to recoil, ideal for use on pistols and automatic rifles.

The Spot-On 4 red dot sight includes two different mount options, giving ultimate versatility. The fixed low mount is ideal for keeping the sight’s profile to a minimum, while the high quick-release mount gives the additional height perfect for co-witness optics.
RED DOT & REFLEX SIGHTS

MICRO REFLEX DOT

Ultra compact mono block construction. Designed to mount low onto a sight-ready slide available on pistol brands such as Glock, Sig, HK, Colt and Springfield.

SPOT-ON 4

Supplied with a high ‘quick release’ mount and a low profile mount. Precise digital brightness makes it ideal for use on indoor ranges or out in the field.

WIDE ANGLE REFLEX DOT

A wider field of view over the standard reflex dot models. 5 MOA dot with digital brightness control. Suitable for mounting on Weaver/Picatinny rails.

VANTAGE

High performance red dots with new ergonomics at affordable prices. Available in three sizes and with an option for Weaver or 9-11mm Dovetail rail fitting.

REFLEX DOT

Available with either standard digital operation or an integrated light sensor that detects the ambient light and automatically adjusts dot brightness.

# ACCESSORIES

**Sunshades Standard**

**OVERVIEW**

When shooting in bright conditions like sunshine, over snow or over water. Sunshades reduce glare and help to cut down internal reflections. Measuring 4 inches/100mm long (2 inches/50mm for 62 001, 62 002 and 62 014), tube sunshades are threaded on each end enabling them to be ‘stacked’ creating a longer shade, or for fitting metal flip-up covers.

## COMPATIBILITY

Please find your product at [www.hawkeoptics.com](http://www.hawkeoptics.com) for compatibility information.

ACCESSORIES
Sunshades Honeycomb

OVERVIEW
When shooting in bright conditions like sunshine, over snow or over water, sunshades reduce glare and help to cut down internal reflections. Due to their design, honeycomb sunshades are a fraction of the length of regular sunshades, only 0.35in/9mm deep. The other key advantage is they stop any reflections from the objective lens reaching the game, making the scope more covert in a hunting situation.

COMPATIBILITY
Please find your product at www.hawkeoptics.com for compatibility information.

BIPODS & RESTS

FEATURES - BIPODS

Height adjustable spring loaded legs
Easily attaches to a swivel stud (excl. 70 015)
Available in fixed, tilt and swivel/tilt configurations
Works with a sling attached
Lightweight high grade alloy with black anodising
Designed to help improve accuracy and stability

FEATURES - PRO BENCHREST

Designed for mounting, zeroing and cleaning riflescopes
360° rotation and 2.4 inch/60mm height adjustment
Angle adjustment from -11° to +26°
Solid steel construction finished in matte black
Support rods with 2 inch/50mm of vertical adjustment
Adjustable rubber feet for uneven surfaces

BINOCULARS

NEW FRONTIER
Exacting standard optical systems for unparalleled viewing performance.  ➔ p.106

ENDURANCE
Advanced optical systems designed to battle the elements. Tough, strong and waterproof.  ➔ p.114

NATURE-TREK
Crisp, clear optics exceeding your expectations. Get closer to your environment.  ➔ p.124

VANTAGE
Maximize your view. Value and performance are standard issue.  ➔ p.132
Using a superior optical system and high-grade materials, the Frontier series produce stunning colour retention, crisp definition and excellent light transmission. You are sure to be blown away by their performance in the field.

Frontier ED X models benefit from Extra-low Dispersion glass and first class coatings throughout which are clear to see. Controlled chromatic aberration eliminates colour fringing allowing all detail to be clearly visible.

The new Frontier HD X models offer stunning high definition viewing with incredible colour control and phase correction. First class lens coatings on all surfaces throughout the binocular and dielectric coated prisms ensure the highest amount of light transmission.

All Frontier binoculars pass through a strict quality control inspection to ensure all aspects match design intent. They are optically checked for resolution, light transmission and Strehl Ratio for optical image formation. They are further tested in extreme operational temperature conditions from -15°C to +55°C and storage temperatures -40°C to +70°C. Final checks of waterproofing to IPX7 and fog proofing are tested.

Frontier ED X and Frontier HD X are both available in a choice of green or grey body, with either 8× or 10× magnification and with option of full size 42mm objective lenses, or more compact 32mm objective lenses.
TWIST-UP EYE CUPS

Replaceable twist-up eye cups with position stops allow you to set correct eye relief depending on personal preference or if eye glasses are being used.

PRECISION FOCUS

Rated for extreme low and high temperature use, the focus knob offers a smooth precise adjustment and a quick turn ratio making focusing the image effortless.

EXTRA-LOW DISPERSION GLASS

Frontier ED X models utilise ED glass to reduce chromatic aberration and increase colour reproduction. Lenses feature a hydrophobic coating to repel water.

PRECISION ENGINEERED CONSTRUCTION

Designed from conception to offer the best performance available. The magnesium alloy body and high grade materials are a cut above the rest.

ERGONOMIC DESIGN

Designed to be well balanced and fit effortlessly in the hand. Frontier binoculars are manufactured with soft touch rubber body armour for comfort in use.

LIGHTWEIGHT HARD CARRY CASE

High quality hard case with space to store a strap and cleaning cloth. A belt loop and notes pocket on the rear complete this indispensable accessory.
FRONTIER ED X
ED Glass | Dielectric Coating | Phase Corrected

FEATURES

- Extra-low Dispersion glass for optimum clarity
- Dielectric Coatings provide increased light reflectivity
- Fully Multi-Coated optics to produce sharp images
- Focus knob with 1.5 turn – close focus from 6.6ft/2m
- High resolution Phase Corrected BAK-4 roof prisms
- Water repellent coating on objective lenses
- Lightweight rubber coated magnesium alloy chassis
- Stay-on lens covers for maximum lens protection
- Replaceable twist-up eye cups with position stops
- Nitrogen purged – water and fog proof
- Hawke lifetime warranty

ENDURANCE

With stunning optics providing crisp, clear and bright images with enhanced light transmission, you will not be surprised that the Endurance range is head and shoulders above all competition in their price range.

Where ED glass is utilised the optics show reduced colour fringing. The Fully Multi-Coated lenses provide high resolution images which ensure no details are lost when viewing at long or short distances down to 6.6ft/2m.

The effortless focusing and impressive depth of field makes these binoculars quick and easy to use. Being water and fog proof with a high grip rubber coated body, Endurance are designed to battle the elements.

Monoculars available with a 42mm or compact 25mm objective lens offer Extra-low Dispersion glass, with the ease and convenience of one-handed use. These are available in 8× and 10× magnifications.
**ERGONOMIC DESIGN**

Textured high grip rubber body, easy to use in all weather conditions. Fully water and fog proof.

**COMPACT BINOCULARS**

The Endurance ED compact features a waterproof twin hinge magnesium alloy body with soft touch rubber finish that folds to pocket size.

**FULLY MULTI-COATED OPTICS**

The high resolution image, from the Fully Multi-Coated optical systems ensure no detail is lost when viewing at long or short distances – down to 6.6ft/2m.

**PRECISION FOCUS**

Effortless focusing and impressive depth of field makes Endurance binoculars and monoculars quick and easy to use.

**TWIST-UP EYE CUPS**

All models feature twist-up eye cups designed to help set the correct eye relief which in turn makes for comfortable viewing.

**ED GLASS MONOCULARS**

Monoculars have Extra-low Dispersion glass to ensure best image quality and colour reproduction. Available in 42mm or a more compact 25mm.

The Nature-Trek family has been sculpted to allow you to get closer to the environment wherever and however you travel. The range has been produced in a shock resistant polycarbonate waterproof body, providing a robust yet lightweight package.

Optics are crisp and clear with notable natural colour reproduction. The smooth and precise rubber focusing wheel fits neatly against fingers and allows the image to focus at short distances down to 6.6ft/2m. The high grip green colour rubber armour ensures a secure hold in all weather conditions.

Nature-Trek offers a complete range of binoculars from the very portable 25mm models up to the oversized 50mm models, ideally suited to low light conditions where a large exit pupil diameter is required.

Included in the range are 42mm and 25mm monocular models, offering a superb viewing experience in an exceptionally compact package.
Every Nature-Trek binocular features twist-up eye cups with three positions that allow the eye relief to be set correctly and ensure a full field of view.

COMPACT MONOCULARS

Featuring the same high performance optics as the full size Nature-Trek binoculars, with the added versatility of an ultra compact design.

COMPACT BINOCULARS

The 25mm models are ideal for casual nature observers. They use the same optical system as the full size models but in a compact design.
**NATURE-TREK**

**FEATURES**
- Ultra-modern top hinge design
- Fully Multi-Coated optics to produce sharp images
- Focus knob with 2 turns – close focus from 6.6ft/2m
- High resolution BAK-4 roof prisms
- Lightweight and durable rubber coated chassis
- Stay-on lens covers for maximum lens protection
- Twist-up eye cups with position stops for eye relief
- Nitrogen purged – water and fog proof
- Hawke lifetime warranty

VANTAGE

MAXIMISE YOUR VIEW.

VANTAGE

Designed to maximize value and performance, without breaking the bank. Using a waterproof chassis and Fully Coated optical system, Vantage binoculars are the perfect choice for casual nature observers.

Image reproduction is clear with true colour. The rubber armour features a rugged feel grip available in green or grey.

A stylish package at an affordable price, the Vantage range comes complete with everything required for an incredible viewing experience.
TWIST-UP EYE CUPS

Three stage twist-up eye cups on both full size and compact Vantage models allows you to set the correct eye relief for a full field of view.

COMPACT MODELS

25mm models utilise the same fully coated optics as the full size range. Designed with portability in mind, the twin hinge chassis easily fits into your pocket.

FULLY COATED OPTICS

Vantage optical systems feature aluminium coated BAK-4 prisms which are highly reflective, ensuring you receive an image that is bright and clear.

HIGH QUALITY CONSTRUCTION

Made to be rugged and durable, the Vantage range features a rubber grip texture that surrounds a waterproof polycarbonate chassis.
VANTAGE

ENDURANCE

EVERY BIT AS DEPENDABLE AS YOU.

Whether your interest is in sports, bird watching or wildlife, Endurance spotting scopes provide the performance to get close to the action and the durability you demand for years of trouble free viewing.

Choose from a range of full size scopes with 85mm and 68mm objectives or the compact design with 50mm objectives. The full size model feature a body rotation ring while the compact models are available in either angled or straight eyepiece configurations.

All magnifications are available with ED glass reducing the potential for Chromatic Aberration. The addition of ED glass controls colour fringing and allows an improvement in clarity and crispness of the image, highly recommended by nature enthusiasts looking for high detail image reproduction.

All lenses are Fully Multi-Coated and prisms Dielectric Coated for increased reflectivity. Endurance scopes feature a dual focus knob (coarse and fine), 3× ratio eyepieces with twist-up eye cups and retractable sunshades. An optional fixed magnification eyepiece is available, suitable for all models.

Finished in a traditional green with black protective rubber accents, all scopes are supplied with lens covers and stay-on soft cases.
**SPOTTING SCOPES ENDURANCE**

**EYEPIECE WITH TWIST-UP EYE CUP**

The screw in eyepieces feature smooth magnification change and a twist-up eye cup with position stops for comfortable viewing.

**BODY ROTATION RING**

On full size models the body rotation ring allow the scope to be canted to the preferred angle for viewing in virtually any position.

**OBJECTIVE LENS**

Hand polished glass lenses for ultimate image reproduction – available with Extra-low Dispersion glass – ED models.

**PRECISION ENGINEERED CONSTRUCTION**

Manufactured using precision CNC components and an exact polycarbonate body producing complete optical and mechanical stability.

**DUAL FOCUS KNOB**

Easily find the target with the coarse focus then tune into every detail with the fine focus.

**FIXED EYEPIECE (OPTIONAL ACCESSORY)**

Suitable for all models the fixed eyepiece offers increased light transmission at a set magnification.

NATURE-TREK

GETTING YOU CLOSER TO THE ACTION.

NATURE-TREK

The Nature-Trek spotting scope family offers exceptional optical performance in a lightweight and waterproof modern design. A Fully Multi-Coated optical system combined with BAK-4 Porro prisms produce extremely clear and sharp images.

The 65mm and 80mm optical systems have been optimised for maximum performance while keeping the scope body short in length making them ideal for hiking and travel. Featuring a rotating tripod band, twist out sunshade and stay-on cover for protection.

OVERVIEW

Spotting scopes can be used in conjunction with digital cameras to obtain close up photos. Hawke offers a range of precision engineered accessories that assist with the setup. Converting the Hawke range of spotting scopes to a digi-scope has never been easier.

Simply choose the digi-scope adaptor for your spotting scope and select the T2 adaptor relevant to your camera. For cameras not matching the T2 adaptors, we suggest using 64 024 or 64 027.

ACCESSORIES
Tripods | Binocular Mount | Balance Plate | Eyepiece

OVERVIEW
For extended binocular viewing the binocular tripod mount attaches to full size binoculars. The mount can then be attached to a tripod for hands free viewing.

To adjust the balance point of a spotting scope the balance plate can be used. This assists in stability.

The fixed power eyepiece offers a wider view while reducing the number of elements, increasing light transmission.

64 102
Adjustable Table Top Tripod
10.2-13.4 Inches / 26-34cm

64 103

Hawke laser range finders are designed to provide a variety of accurate distance measurements with the press of a button. They have been ergonomically designed to fit your hand with easy access to both buttons.

New for 2019, Hawke have developed OLED technology range finders that give precision a whole new look. The Hawke Endurance LRF’s use of high light transmission optics and red coloured OLED display makes the view to your target brighter than ever before. Distance, Horizontal Distance, Angle, Rain and Hunt modes make this feature rich range finder the perfect hunter’s choice. Built with a compact body and supplied with a protective case to complete the perfect accessory for hunters and target shooters alike. Available in 700m, 1000m and 1500m versions.

Hawke Professional LRF models, with LCD display, include: Distance, Height, Height Difference and Angle modes, making them perfect for surveying and target shooting. Available in 400m, 600m and 900m versions.

Hawke Compact LRF models, with LCD display, have been specifically designed with modes for hunting. The Compact models include: Distance, Rain and Hunt modes. Available in 400m and 600m versions.

Manufactured with an eye safe CE approved laser.
ENDURANCE LASER RANGE FINDER

FEATURES

- Fully Multi-Coated optical system – BK-7 prisms
- 6× magnification and an adjustable dioptré
- OLED display with red illuminated icons
- High light transmission with true colour optics
- Standard/Horizontal Distance/Angle/Rain/Hunt modes
- Wide Angle optical system – 420ft/140m @ 1000yds
- Measure distances accurate to +/- 1 metre/yard
- Auto shut off battery save feature
- Lightweight and compact construction
- Ergonomically designed to fit in your hand
- Nitrogen purged – water and fog proof
- Hawke two year warranty

SUPPLIED WITH

- CR2 battery
- Wrist strap
- Lens cloth
- Carry case

LASER RANGE FINDER PROFESSIONAL

FEATURES

- Fully Multi-Coated optical system – BK-7 prisms
- 6× magnification and an adjustable dioptre
- Twist-up eye cup to ensure proper eye relief
- Standard/Beeline/Height/Height Difference/Angle modes
- Measure distances accurate to +/- 1 metre/yard
- Auto shut off battery save feature
- Ergonomically designed to fit in your hand
- Nitrogen purged – water and fog proof
- Hawke two year warranty

SUPPLIED WITH

- CR2 battery
- Wrist strap
- Lens cloth
- Carry case

The Hawke Nite-Eye 2000 monocular is the perfect optical device to enhance your vision at night. Capture still images and record videos in complete darkness.

An adjustable built-in infrared illuminator enhances your view in darker conditions without being visible to the naked eye. The fixed 5× optical zoom and further digital zoom get you closer to the action.
NITE-EYE 2000

FEATURES

5× fixed magnification with additional digital zoom
Observe up to 200yds/m in total darkness
Capture 5MP photos and record 10 minute videos
Built-in infrared illuminator with 9 levels of brightness
Weaver/Picatinny rail and threaded tripod mount
Playback media on computer or on the monocular
Supplied with 8GB micro SD card (32GB max.)
Hawke two year warranty

SUPPLIED WITH

- Carry case
- USB lead
- Mains charger
- Lens cover
- 18650 battery
- 8GB micro SD
- Lens cloth
