

***Have it your way*** – AME Planters with options you demand

### Generic Row Unit

Generic row unit with all major components in cast iron – Shank, Face Plate and Lower Parallel Arms. Our units are comparable with most of the popular planter row units made to date. They are capable of utilizing Precision Planting® products and accessories along with most of the industry leading manufacturer's products and components.

The manual for the planters can be downloaded from <http://www.a-m-e.co/index-3.html>

## Your Choice of Drive

AME row units can accept standard chain drive, flex drive, hydraulic drive or electric drive meters. Additionally, you have a choice of mechanical finger pick-up meter or vacuum seed delivery meter. You can also set your row units as individual drives or zone drives or full hex shaft standard arrangement.

## Your Choice of Down Force

AME row units are standard with twin down pressure springs but will accept hydraulic down force, Air Force®, Air bags and many other down pressure systems that are available on the market today. We are capable of accepting aftermarket row cleaners, no-till coulters, fertilizer openers and other attachments.

## Your Choice of Hopper

AME row units can accept standard 1.6 bushel, large 3 bushel hoppers or mini drives for central fill system. Smart Box® mounting brackets are also available. Optional narrow gauge wheel units especially suitable for 15" planting are additionally available.

## Your Choice of 7" x 7" or T-Bar® Toolbars

AME new T-Bar® design allows infinite adjustability in row spacing and configuration as well as interchangeability with other implements as strip till, side dresser, NH3 applicators etc. This gives you an option of using your tool bar more than once in a single season.
