COMPANY OVERVIEW

AirX Utility Surveyors, Inc. is Southern California's premier full-service Subsurface Utility Engineering (SUE) service provider for over 17 years. Backed by skilled engineers, contractors, managers, locators and potholers, we have more than 50 years of trade experience locating and identifying underground utilities. Our services ensure work and cost efficiency and most importantly, safety. With over 2300 projects completed, AirX develops solid relationships with Prime Contractors, Engineering Firms, Municipalities, Cities, Counties, Airports and Water Districts based on reputation and dependability.

PAST PERFORMANCE

- 2013 - Now** Pipeline Safety Enhancement Plan (PSEP) - A 10-year, billion-dollar project to test and/or replace outdated gas lines throughout Southern California.
- 2008 - Now** County of San Diego - AirX has been providing "as needed" SUE services since 2006 including the county-wide replacement of culverts.
- 2017** North City Water Reclamation Plant - As part of the redesign of the NCWRP for Phase 1 of San Diego's Pure Water Project, AirX provided potholing and utility locating for the plant's planned expansion of capacity from 30 million gallons a day (mgd) to 52 mgd.
- 2016 - 2017** SX to PQ - Installation of a new electrical transmission line that extended over 17 miles and called for over 800 potholes and utility locating.
- 2013 - 2016** Mid-Coast Trolley - An extension of San Diego's light rail system from downtown to the northern coastal part of the city.
- 2015** Mid-City Pipeline Phase 2 - A project to install a new 54", 6505 linear foot water pipeline in San Diego.
- 2013** Harrah's Rincon Casino - Utility locating including GPR and concrete scanning services in support of the casino's expansion efforts.
