# WELCOME

to JUWEL Aquarium

For more than 45 years JUWEL Aquarium has been synonymous with quality and innovation in aquarium manufacturing and thus sets standards in design and technology. Emphasis was placed on a systems concept right from the start.

We therefore developed the technology required for the successful operation of an aquarium from early on and our first brand was able to offer a range of aquariums with components that are all perfectly compatible with each other.

We have remained true to this principle, so that today, JUWEL Aquarium is synonymous with high-quality system aquariums, ultra-modern technology and the highest quality standards.

To this day, an experienced team is constantly working with great enthusiasm to create a beautiful home for your fish. This has made us the leading aquarium brand in Europe.

*Your Juwel team*

# JUWEL SYSTEM

ALL-INCLUSIVE | JUWEL SYSTEM

5

Everything is inclusive with us!

## Aquariums – Made in Germany

High-quality materials and high-precision, robot-aided production in Germany guarantee our high quality standard with the production of a JUWEL aquarium.

## Cover and lighting

The High Output T5 technology, specially optimised to the length of the aquarium for up to 150% more light. The convenient cover makes easy access to the aquarium possible with full lighting.

## Bioflow filter system

Excellent filtering thanks to the dual-flow principle for optimum development of filter bacteria.

## Premium adjustable heater

Premium heater integrated invisibly into the water circuit of the filter system with high-quality silver contacts and impact-resistant safety glass for optimum heat distribution in the aquarium.

## Suitable for use with saltwater aquariums

All JUWEL aquariums are prepared for operation with saltwater and can be converted into a saltwater aquarium in a few easy steps.

## Base unit

Optimised base unit in terms of statics and construction for the respective aquarium, available in all JUWEL décors.

## Thoroughly tried and tested: The JUWEL Bioflow filtration system

The Bioflow filter system guarantees optimum filtering thanks to the unique dual flow principle and perfectly coordinated filter media.

### Easy to handle

Particularly easy care and maintenance, thanks to practical filter baskets.

### Dual flow principle

Excellent filtering thanks to the dual-flow principle for optimum development of filter bacteria.

### Filter volume

Larger filter volume for particularly intense filtering and long standing times.

### Adjustable heater

Invisible adjustable heater that is integrated in the water circuit.

### Circulating pump

Highly-efficient and whisper-quiet flow pump of the new Eccoflow generation with double-mounted impeller axle.

# FILTER MEDIA

Optimum filtering, thanks to perfectly coordinated filter media.
