Asphalt Release Concentrate is an advanced bio-based solution containing 96% fatty acid methyl ester produced from 100% soybean oil.

KEY BENEFITS:

- Can be used in concentrated form for cleaning asphalt equipment and tools
- Effective release agent for polymer asphalt mixes
- Excellent product solubility
- Flash point > 200°F
- Biodegradable
- Very low VOCs

DIRECTIONS FOR USE:

- Use in concentrated form on chains, sprockets, conveyors and truck release pins to keep moving parts free of asphalt.
- For use as an asphalt release agent, dilute with water to desired strength (30:1 or 50:1).

DILUTION RATES:

- | | |
|-----------------------------|--------------|
| • Standard | 30:1 |
| • Rubber Asphalt or PMA Mix | 6:1 to 15:1 |
| • Heavy "A" Oil | 10:1 to 15:1 |

SPECIFICATIONS:

Moisture, Karl Fischer.....	<.1%
Specific Gravity at 25°C.....	0.89
Appearance	Light Yellow Liquid
Color, Gardner	12
VOCs	< 50 g/L
