

Completing the Course in “The Optometry Team”

(FOR THE STAFF MEMBER)

Check Your Progress

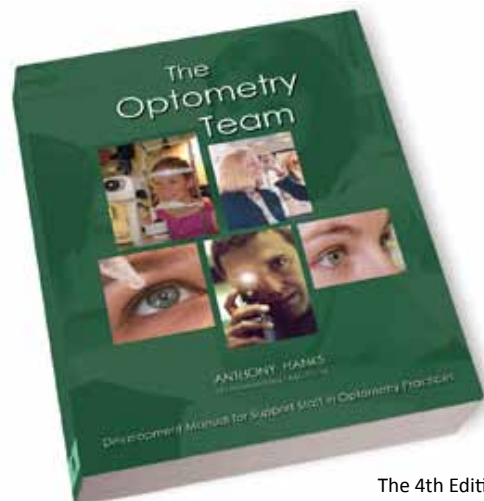

The Optometry Team has been written to assist optometrists in training their support staff. To support this purpose, there are review pages after groups of topics. These are titled *Check Your Progress* and are intended to be completed as the reader works their way through the book.

From the Beginning, or Selected Topics?

The book is also designed to allow access to information via the *Fast Find Index*. However, new employees are advised to work their way through the revision pages from the beginning. The completed responses should then be reviewed with the supervising optometrist.

The 4th Edition

Completion Certificate

To recognise successful completion of the course in *The Optometry Team*, a personal framed certificate is available. After the *Check Your Progress* pages have been confirmed by the supervision optometrist, return the form in the back of the book.

A detailed listing of the topics included in the course is available on the publishers website. (See *Support* then *FAQ's - The Optometry Team*).

There may also be a future situation where a staff member has relocated to another area and this training will make them more valuable when seeking new

employment. The following could be included in the individual's resume:

Certificate of Achievement, "The Optometry Team" Training & Development Course for Optometric Staff (completion date).

Completion Badge

Staff can recognise their achievement by wearing *The Optometry Team* certification badge at work. This beautiful enamelled badge also gives patients confidence that education and training are valued in this practice.

Badges have a magnetic back and can be ordered from the publisher's website: www.hanks.optom.com.au.
