

## SHATTER NEGATIVITY WITH A THOUGHT-PART II

### A NEW VISION OF LIFE

By thought shifting to the greater good of others is how the negative energy pathway of the world will start to change. The thought intention for the highest good of others creates a transfer of positive energy that will radiate and bounce back off the highest good action, which will then satisfy the individual's need. It is the realization that others' needs are truly our own needs. It is the oneness concept. If a person decides to accept this change in their thought process the result will be a new vision of life.

Once the decision is made to change the thought process to the greater good then it is as if a giant book opens and all instructions, directions, wisdom and answers are given to all. All knowledge becomes available. Advanced knowledge that has never been known before becomes available. It is knowledge based upon an inner opening of the mind. A blocked off portion of the mind that has never been known before. It is an unveiling of a blocked off cave. A cave within the mind that has been unknown. It is a cave of knowledge that becomes available to all. The switch in the thought process is what opens the door to this cave of knowledge.

It is creating a world in which positive energy, wisdom and knowledge buffer the negativity. Through the buffering there will be a reduction in all that is created by negative energy. All negative energy that is filled and made up of self- need fulfillment will be deflated. In the deflation process, there will be more positive changes that will individual growth in all forms. A thriving will start to be seen in all beings. A thriving in the land, air, water-all that is impacted by energy. It is as if there will be a comfort blanket of positive energy around all beings. It will serve as a shield against negative energy.

The comfort blanket will also serve as a conductor that will pull more positive energy inside of the blanket. This comfort blanket of positive energy builds and builds, continues to push against each other, expanding and expanding until the negative energy is pushed out of the way. It also helps to increase the vibrational level of the world.

Sound in the world will change. There will be a lessening of loud, hurtful sounds and an increase in soft, peaceful sounds. Sounds that help to heal rather than harm. Soft sounds have healing ability beyond what we currently know. The soft sound will enter the body of any being and work towards desensitizing the nerve endings so that the body and mind will relax.

Vision of the individual will also change. The input and output of positive energy through vision will be healing. Positive energy attaches to the eye and acts as a buffer from negative energy entering in this way.
