

Discovering Truth

Original Article written on 04 December 2015

The story of young children from the ages of 10 -15, seeking to ensure they have a planet for their generation. Our President and world leaders have considered their objective to "Climate Change". As I continued to read the in the local "[Spokesman-Review](#)", it was apparent they have fear of a planet going extinct. As our generation has not been responsible in the preserving our planet for the next generation.

Story I read for this blog are on - [pages 3 and 4](#)

The question then comes to mind is where do they obtain this information? Who and what motivates them to take on the government through the court system? I have to give these young enthusiasts credit in pursuing their cause as it is an ongoing battle in this modern time. With your participation on this issue, I am sure we will have our own ideas on how to control global warming, or that it does not threaten the planet's future. That global warming and cooling is only part of the planet's cycle.

How to start this investigation, I decided to put both science and faith on trial. The objective is to have both science and faith eventually connect from a parallel beginning. How can both science and faith work together towards a solution, or if not a solution to a universal discovery on who we are and our planet we call earth.

Before we begin our adventure we must begin with reading a section in the Bible, Ecclesiastes 12 and answer the question below. Throughout this journey you will be able to ask questions, post research on the subject and source and make comments on the subject. The reading, should only take 10 minutes of your time.

What does the 'Preacher' of Ecclesiastes compare the words of the wise to (KJV)?

- 1) Goads and Nails
- 2) Flourishing gardens
- 3) Hammers and Anvils
- 4) Precious jewels

As you read, some questions you must ask yourself, who is the writer? Who is he writing to? What has he discovered about life? What is the most important objective in life? How can we apply this to our current situation in the problem of global warming? How has science helped us achieve some of the solutions in solving global warming and how does faith prepare us for the future?

Can Man Live Without God Paperback – August 30, 2004

In this brilliant and compelling defense of the Christian faith, Ravi Zacharias shows how affirming the reality of God's existence matters urgently in our everyday lives. According to Zacharias, how you answer the questions of God's existence will impact your relationship with others, your commitment to integrity, your attitude toward morality, and your perception of truth.
