INNOVATORS IN SLEEP

POLAR PAD

The Polar Pad is made for those who sleep hot, using Active Cooling Technology to reticulate water through a mattress pad. It also doubles as a winter warmer with its ability to heat to 43°C and is safer than traditional electric blankets.

The thermostat has 80 Watt power consumption – less than a lightbulb!

ORIGINAL COOL PAD

The original Cool Pad is ideal for hot sleepers who have trouble getting to sleep by reducing initial body temperatures during hot summer nights.

The Cool Pad is suitable for all beds and easy to clean, just wipe with a damp towel.
