

Pearson Edexcel Level 3 Advanced Subsidiary GCE in Economics A (8EC0)

Sample Assessment Materials (SAMs)

First certification 2016

This draft qualification has not yet been accredited by Ofqual. It is published to enable teachers to have early sight of our proposed approach to the Pearson Edexcel Level 3 Advanced Subsidiary GCE in Economics A. Further changes may be required and no assurance can be given at this time that the proposed qualification will be made available in its current form, or that it will be accredited in time for first teaching in September 2015 and first award in 2016.

Edexcel, BTEC and LCCI qualifications

Edexcel, BTEC and LCCI qualifications are awarded by Pearson, the UK's largest awarding body offering academic and vocational qualifications that are globally recognised and benchmarked. For further information, please visit our qualification websites at www.edexcel.com, www.btec.co.uk or www.lcci.org.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus

About Pearson

Pearson is the world's leading learning company, with 40,000 employees in more than 70 countries working to help people of all ages to make measurable progress in their lives through learning. We put the learner at the centre of everything we do, because wherever learning flourishes, so do people. Find out more about how we can help you and your learners at: www.pearson.com/uk

Paper 2 – sample question paper and mark scheme	43

Introduction

The Pearson Edexcel Level 3 Advanced Subsidiary GCE in Economics A is designed for use in schools and colleges. It is part of a suite of GCE qualifications offered by Pearson.

These sample assessment materials have been developed to support this qualification and will be used as the benchmark to develop the assessment students will take.

General marking guidance

- All candidates must receive the same treatment. Examiners must mark the last candidate in exactly the same way as they mark the first.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than be penalised for omissions.
- Examiners should mark according to the mark scheme – not according to their perception of where the grade boundaries may lie.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification/indicative content will not be exhaustive.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, a senior examiner must be consulted before a mark is given.
- Crossed-out work should be marked **unless** the candidate has replaced it with an alternative response.

Pearson Edexcel Level 3 GCE

Economics A

Advanced Subsidiary

Paper 1: Introduction to markets and market failure

Sample assessment material for first teaching
September 2015
Time: 1 hour 30 minutes

Paper Reference(s)

8EC0/01

You do not need any other materials.

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- There are two sections in this question paper.
- Answer **all** questions in Section A.
- In Section B, answer **all** of questions 6(a) to 6(e) and one question from 6(f) or 6(g).
- Answer the questions in the spaces provided
 - *there may be more space than you need.*

Information

- The total mark for this paper is 80.
- The marks for each question are shown in brackets
 - *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

BLANK PAGE

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

Use the data to support your answers where relevant. You may annotate and include diagrams in your answers.

1 Statement 1: The UK government increased education spending from £86.9 billion in 2012 to £87.3 billion in 2013.

Statement 2: The government should allocate an additional £1 billion to schools to improve the quality of education.

(a) Which **one** of the following best describes the two statements above?

Statement 1	Statement 2
A Positive	Positive
B Positive	Normative
C Normative	Positive
D Normative	Normative

Answer:

(1)

(b) With reference to the statements above explain what is meant by external benefits.

(3)

.....

.....

.....

.....

.....

.....

.....

.....

(Total for Question 1 = 4 marks)

2 The diagram shows a production possibility frontier for an economy.

(a) Define the term 'production possibility frontier'.

(2)

.....

.....

.....

.....

(b) The opportunity cost of a movement from point X to point Y is:

- A 10 units of consumer goods
- B 20 units of capital goods
- C 30 units of capital goods
- D 90 units of consumer goods

Answer:

(1)

(c) Illustrate economic growth on the diagram on page 4.

(1)

(Total for Question 2 = 4 marks)

3 In 2013, the UK had more off-shore wind turbines than all other countries in the world combined. The UK government announced plans to close five coal-burning power stations and to build five nuclear power stations to produce electricity. One nuclear power plant at Hinckley Point will take 10 years to be fully operational.

(a) Which **one** of the following is the correct classification for these energy sources?

Wind turbines

Coal

A non-renewable

renewable

B non-renewable

non-renewable

C renewable

non-renewable

D renewable

renewable

Answer:

(1)

(b) Explain the likely price elasticity of supply for energy generated by nuclear power plants.

(3)

.....

.....

.....

.....

.....

.....

.....

(Total for Question 3 = 4 marks)

4 The UK government allocated £39 billion to defence in 2012/2013.

(a) Explain why defence is a public good.

(3)

.....

.....

.....

.....

.....

.....

(b) Which **one** of the following is an example of market failure?

- A The price of a good falling to clear the market when there is excess supply
- B The over consumption of cigarettes owing to consumers' lack of information
- C A rise in unemployment caused by an increase in the minimum wage
- D Consumers experiencing diminishing marginal utility

Answer:

(1)

(Total for Question 4 = 4 marks)

5 According to research, 57% of UK consumers would consider changing insurance providers in the next 12 months.

(a) The underlying assumptions of rational decision making are that:

- A consumers aim to maximise utility and firms aim to minimise profits
- B consumers aim to minimise utility and firms aim to maximise profits
- C consumers aim to maximise utility and firms aim to maximise profits
- D consumers aim to maximise utility and firms aim to maximise costs

Answer:

(1)

(b) Explain **one** possible reason why 43% of consumers in the UK would not consider changing insurance providers, even though they may be offered lower prices by other insurance providers.

(3)

.....

.....

.....

.....

.....

.....

.....

(Total for Question 5 = 4 marks)

TOTAL FOR SECTION A = 20 MARKS

BLANK PAGE
PLEASE TURN OVER FOR QUESTION 6

SECTION B

Read Figure 1 and the following extracts (A to C) before answering Question 6.

Answer ALL Questions 6(a) to (e), and EITHER Question 6(f) OR Question 6(g)

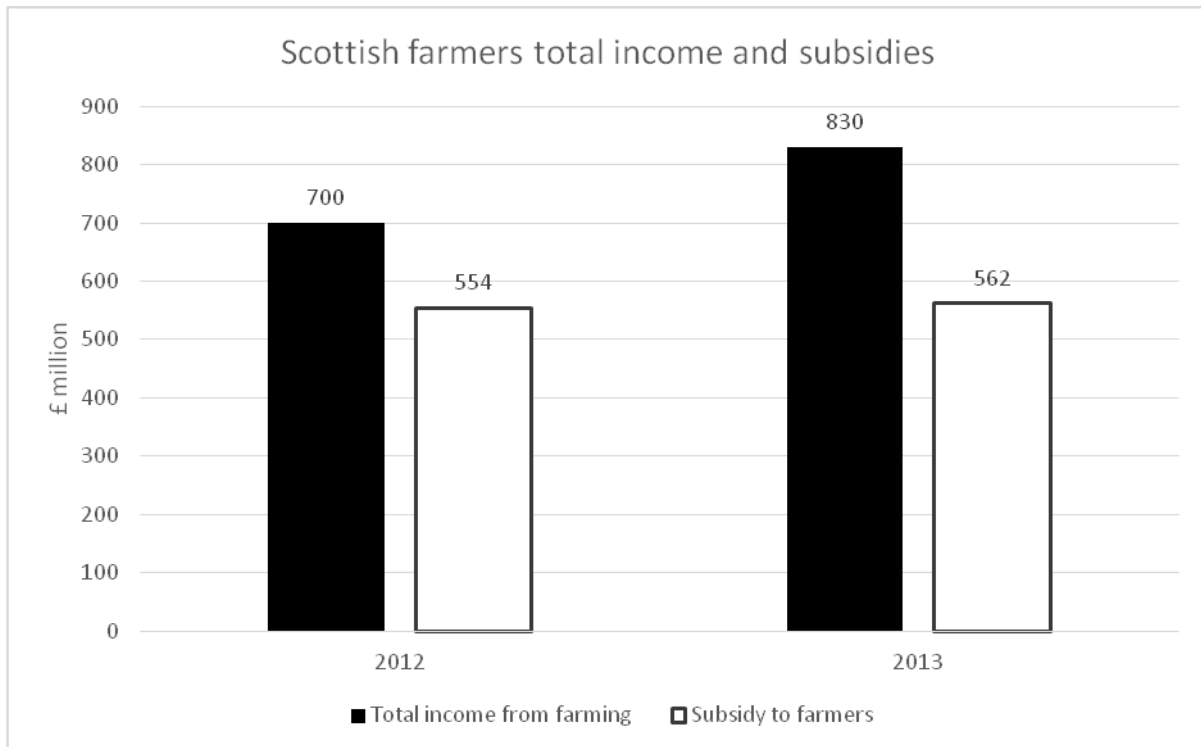

Question 6**The market for beef****Extract A****Boost to UK farmers**

The horsemeat scandal of 2013, affected the demand for many processed meat products. Traces of horsemeat were discovered in products labelled as beef, manufactured by many overseas suppliers. With many beef products customers had little knowledge about where the beef came from. If the manufacturers knew, they were not always making this clear to customers.

As a result of the scandal, the proportion of domestically-sourced beef in British shops rose from 81% to 83% in 2013. Consequently, the prices farmers received for beef in the UK rose by 3%.

Another potential boost for UK farmers is demand from emerging markets. As the middle class grows in countries such as China, so does their demand for protein and dairy products. British meat and dairy products are seen as offering a stable and proven supply chain, unlike in China where baby milk has been found with traces of the plastic melamine. State-owned Chinese companies are approaching dairy farmers directly to secure millions of litres of UK milk.

(Source: 'Boom in farming as UK demands quality' by Graham Ruddick, The Telegraph 25th Jan 2014
<http://www.telegraph.co.uk/finance/newsbysector/retailandconsumer/10596862/Boom-in-farming-as-UK-demands-quality.html>)

Figure 1: Total income from farming and subsidies for Scottish farms 2012 and 2013**Extract B****Reliance on farm subsidies**

There is a reliance on subsidies in Scottish farms. The argument for subsidies is that farming is vital to the rural economy and that support payments to farmers can benefit the local community. The counter argument is that farmers should make a living from the free market for what they produce.

Farm subsidies will continue in the European Union. In many of the member states, agriculture and the vast food industry that depends on it still hold significant political influence. Although farmers in the UK complain that their share of EU subsidies is already too low, changes to the EU farm subsidies due to take effect in 2015 mean they are likely to be slashed by one third to one half.

(Source: adapted from 'Even the best farmers would struggle in a free market,' The Southern Reporter, 6th Feb 2014, <http://www.thesouthernreporter.co.uk/opinion/columnists/even-the-best-farmers-would-struggle-in-a-free-market-1-3296583>)

Extract C

Hidden costs of beef

Eating too many beefburgers has a high cost on the planet and people. The statistics are significant: it takes 1 800 gallons of water to make a single pound of grain-fed beef and 30% of the world's land is used to raise livestock. Cows produce more climate-changing greenhouse gases than the emissions from 22 million cars a year. In addition, tons of fertilisers and toxic contaminants are used in the production of beef.

If Americans stopped eating meat and cheese for just one day a week, the environmental impact would be the equivalent of taking 7.6 million pollution-producing cars off the road for a year, according to a recent report.

(Source: 'News group serves up hidden costs of hamburgers,' by Sarah Henry, August 10, 2012
<http://www.berkeleyside.com/2012/08/10/news-group-serves-up-the-hidden-costs-of-hamburgers/>)

(a) Explain why 'the prices farmers received for beef in the UK rose by 3%' in 2013 (Extract A, lines 7 and 8). Include a supply and demand diagram in your answer.

(5)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) Assess the likely impact of a 3% increase in the price of UK beef on the market for lamb. (10)

Dotted lines for writing the answer.

(c) Explain **two** likely impacts on dairy farmers in the UK of the growth in the middle classes in emerging markets such as China.

(6)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(d) With reference to Figure 1, calculate the value of subsidies as a percentage of total Scottish farm income for 2012 and 2013. You are advised to show your working.

(4)

2012

.....

.....

.....

.....

2013

.....

.....

.....

.....

(e) With reference to Figure 1, Extract 2 and your own knowledge, discuss the reasons for subsidies being paid to Scottish farmers.

(15)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

A large rectangular area with rounded corners, containing 20 horizontal dotted lines for writing.

EITHER

(f) Using the concept of external costs, evaluate the possible economic effects of increased beef production. Use an appropriate diagram in your answer.

(20)

OR

(g) Evaluate the impact of a guaranteed minimum price in the beef market on consumers and producers. Use an appropriate diagram in your answer.

(20)

Indicate which question you are answering by marking a cross [x] in the box. If you change your mind, put a line through the box [~~x~~] and then indicate your new question with a cross [x].

Chosen Question Number:

Question 6(f) [x]

Question 6(g) [x]

Write your answer here:

4(b)	B	(1)

Question Number	Answer	Mark
5(a)	C	(1)

Question Number	Answer	Mark
5(b)	<p style="text-align: center;">Knowledge 2, Application 1</p> <p>Knowledge 1 mark for identifying a reason. 1 mark for linked development.</p> <p>Application 1 mark for application to insurance, e.g. consumers may not act rationally because:</p> <ul style="list-style-type: none"> • inertia (1) means people do not have the energy or inclination to move (1), so will not spend the time searching for the best deal (1) • the importance of habitual behaviour (1) people are in the habit of using the same provider so continue to do so (1), and will not spend the time searching for the best deal (1) • computation problems (1) where they cannot calculate the benefits they will accrue from switching providers (1), so will not see better deals available in terms of lower premium (1). 	(3)

Question Number	Answer	Mark
<p>6(a)</p>	<p style="text-align: center;">Knowledge 1, Application 2, Analysis 2</p> <p>Knowledge 1 mark for original supply, demand and equilibrium.</p> <p>Application 1 mark for using source data (1) and 1 mark for link to change in demand (1), e.g.</p> <ul style="list-style-type: none"> increased meat sourced from UK, 81% to 83%/increased sales to emerging markets (1) leading to increased demand (1). <p>Analysis</p> <ul style="list-style-type: none"> Diagram – showing shift in demand (1) and new equilibrium (1). <div style="text-align: center;"> </div>	<p>(5)</p>

Question Number	Indicative content	Mark
6(b)	<p style="text-align: center;">Knowledge 2, Application 2, Analysis 2</p> <ul style="list-style-type: none"> • Define cross elasticity of demand. • Identify lamb as substitute. • XED - positive - as price of beef rises the demand for lamb will rise. • Diagram to show increased demand for lamb. • Price and quantity both rise for this good. • Likely to lead to increased revenue. • Increased producer surplus. • Increased consumer surplus. 	(6)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–2	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no links between causes and consequences.
Level 2	3–4	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relate them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or the answer may lack balance.
Level 3	5–6	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are applied appropriately to the broad elements of the question.

Question Number	Indicative content	Mark
6(b) continued	<p style="text-align: center;">Evaluation 4</p> <ul style="list-style-type: none"> • Magnitude - depends on amount of price adjustment. • Short run little change - people do not adjust to price changes straight away/long run may take time for people to substitute. • Closeness of substitutes - inelastic supply means little impact/elastic larger impact. 	(4)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1-2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3-4	Evaluative comments supported by chains of reasoning and appropriate reference to context. Evaluation is balanced and considers the broad elements of the question.

Question Number	Answer	Mark
6(c)	<p style="text-align: center;">Application 2, Knowledge 2, Analysis 2</p> <p>Application 2 marks for, e.g.</p> <ul style="list-style-type: none"> • desire for protein/dairy - 30-50m litres (1) • increased demand (1). <p>Knowledge/understanding e.g, any two from:</p> <ul style="list-style-type: none"> • higher prices (1) • higher output (1) • revenue rise (1). <p>Analysis e.g, any two from:</p> <ul style="list-style-type: none"> • increased profits/producer surplus identified/shown in diagram (1) • investment required for machinery and logistics getting products to China (1) • firms will export more products (1). 	(6)

Question Number	Answer	Mark
6(d)	<p style="text-align: center;">Knowledge 2, Application 2</p> <p>2 marks for correct use of formula (1+1). 2 marks for correct answer (1+1), e.g:</p> <ul style="list-style-type: none"> • 2012 - $554/700 (1) \times 100 = 79\% (1)$ • 2013 - $562/830 (1) \times 100 = 68\% (1)$ <p>NB if the answer given is 79% award 2 marks; if the answer given is 68% award 2 marks.</p>	(4)

Question Number	Indicative content	Mark
6(e)	<p style="text-align: center;">Knowledge 3, Application 3, Analysis 3</p> <ul style="list-style-type: none"> • Define subsidy. • Application - £554m – 79%/69% of income. <p>Reasons for a subsidy include:</p> <ul style="list-style-type: none"> • lowers production costs • increases supply (on diagram or written) • lowers price (on diagram or written) • increases quantity (on diagram or written) • more accessible to poor (low price) • higher meat and milk consumption • vital rural economy – protects incomes/jobs • maintains/guarantees food supply • trickle-down effect • food industry relies on them. 	(9)

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1–3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4–6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response; chains of reasoning are developed but the answer may lack balance.
Level 3	7–9	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using relevant and focused examples which are fully integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
6(e) continued	<p style="text-align: center;">Evaluation 6</p> <p>Reasons against a subsidy include:</p> <ul style="list-style-type: none"> • 79%/ 69% of income is subsidy • reliant on subsidy • X-inefficient • should be allowed to get out of market and make room for someone else • cost to government – opportunity cost. 	(6)

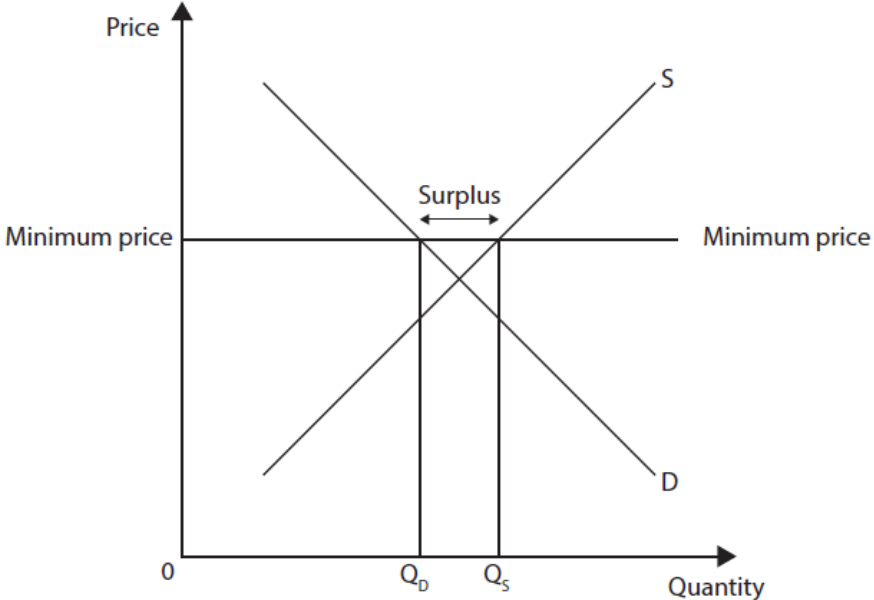

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant chain of reasoning and appropriate reference to context. Evaluation is balanced and considers the broad elements of the question.

Question Number	Indicative content	Mark
<p>6(f)</p>	<p style="text-align: center;">Knowledge 4, Application 4, Analysis 6</p> <ul style="list-style-type: none"> • Define external costs. • Diagram accurately drawn – with MPC, MSB, MPB and MSC, welfare loss triangle. <div style="text-align: center;"> </div> <ul style="list-style-type: none"> • It takes 1,800 gallons of water to make a single pound of grain-fed beef. • Thirty per cent of the world’s land is used to raise livestock. • Major producers of methane gas. • These animals produce more climate-changing greenhouse gases than 22 million cars a year. • Manure, tons of fertilisers and toxic contaminants used in slaughterhouses. 	<p>(14)</p>

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4-6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two-stage chain of reasoning only.
Level 3	7-10	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	11-14	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
6(f) continued	<p style="text-align: center;">Evaluation 6</p> <ul style="list-style-type: none"> • Magnitude – depends on how much additional meat. • Measurement difficult- putting a value on external costs. • Increased demand - higher revenues. • Benefits of increased consumption - export income. 	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.
Level 3	5–6	Evaluative comments supported by relevant reasoning and appropriate reference to context. Evaluation is balanced and considers the broad elements of the question, leading to a substantiated judgement.

Question Number	Indicative content	Mark
<p>6(g)</p>	<p style="text-align: center;">Knowledge 4, Application 4, Analysis 6</p> <ul style="list-style-type: none"> • Diagram showing minimum price above market equilibrium. <div style="text-align: center;">  </div> <ul style="list-style-type: none"> • Define minimum price. • Reasons for minimum price – protect incomes of producers. • Raise price of beef/ cause excess supply. • Contraction of demand/ extension supply. • Government may have to buy excess supply • Reduce consumption of meat – reduce obesity. • Link to NHS. 	<p>(14)</p>

Level	Mark	Descriptor
	0	A completely inaccurate response.
Level 1	1-3	Displays isolated or imprecise knowledge and understanding of terms, concepts, theories and models. Use of generic or irrelevant information or examples. Descriptive approach which has no chains of reasoning or links between causes and consequences.
Level 2	4-6	Displays elements of knowledge and understanding of economic principles, concepts and theories. Applies economic ideas and relates them to economic problems in context, although does not focus on the broad elements of the question. A narrow response or superficial, two-stage chains of reasoning only.
Level 3	7-10	Demonstrates accurate knowledge and understanding of the concepts, principles and models. Ability to apply economic concepts and relate them directly to the broad elements of the question with evidence integrated into the answer. Analysis is clear and coherent, although it may lack balance. Chains of reasoning are developed but the answer may lack balance.
Level 4	11-14	Demonstrates precise knowledge and understanding of the concepts, principles and models. Ability to link knowledge and understanding in context using appropriate examples. Analysis is relevant and focused with evidence fully and reliably integrated. Economic ideas are carefully selected and applied appropriately to economic issues and problems. The answer demonstrates logical and coherent chains of reasoning.

Question Number	Indicative content	Mark
6(g) continued	<p style="text-align: center;">Evaluation 6</p> <ul style="list-style-type: none"> • Anti competition. • Magnitude of price changes – increase then may put businesses out of business – job losses. • Delays – time lag before it starts. • Encourage smuggling – if minimum price. • Imports. • Magnitude – depends on size of minimum/maximum price pricing. • Elasticity of demand- if inelastic little change. • Time lag – people will not change behaviour immediately. 	(6)

Level	Mark	Descriptor
	0	No evaluative comments.
Level 1	1–2	Identification of generic evaluative comments without supporting evidence/reference to context. No evidence of a logical chain of reasoning.
Level 2	3–4	Evidence of evaluation of alternative approaches which is unbalanced leading to unsubstantiated judgements. Evaluative comments with supporting evidence/reference to context and a partially developed chain of reasoning.

Pearson Edexcel Level 3 GCE

Economics A

Advanced Subsidiary

Paper 2: The UK economy – performance and policies

Sample assessment material for first teaching
September 2015

Time: 1 hour 30 minutes

Paper Reference(s)

8EC0/02

You do not need any other materials.

Instructions

- Use **black** ink or ball-point pen.
- **Fill in the boxes** at the top of this page with your name, centre number and candidate number.
- There are two sections in this question paper.
- Answer **all** questions in Section A.
- In Section B, answer **all** of questions 6(a) to 6(e) and one question from 6(f) or 6(g).
- Answer the questions in the spaces provided
 - *there may be more space than you need.*

Information

- The total mark for this paper is 80.
- The marks for each question are shown in brackets
 - *use this as a guide as to how much time to spend on each question.*

Advice

- Read each question carefully before you start to answer it.
- Try to answer every question.
- Check your answers if you have time at the end.

SECTION A

Answer ALL questions. Write your answers in the spaces provided.

Use the data to support your answers where relevant. You may annotate and include diagrams in your answers.

1 The table below shows UK annual real GDP values for 2011–2013.

	Annual real GDP (£ billion)
2011	1 502
2012	1 506
2013	1 534

(Source: ONS)

(a) Define the term ‘economic growth’.

(1)

.....

.....

(b) Calculate the annual UK economic growth rate for 2013. You are advised to show your working.

(2)

.....

.....

.....

.....

(c) Which one of the following can be inferred from the table?

- A Real GDP was falling between 2012 and 2013
- B The annual UK economic growth rate for 2012 was negative
- C Nominal GDP was falling between 2012 and 2013
- D The annual UK economic growth rate for 2012 was positive

Answer:

(1)

(Total for Question 1 = 4 marks)

2 In 2011, the Bank of England estimated that the marginal propensity to consume for UK households was on average 0.4.

(Source:
<http://www.bankofengland.co.uk/publications/Documents/quarterlybulletin/qb110402.pdf>)

(a) Define the term ‘marginal propensity to consume’.

(1)

.....

.....

(b) Calculate the value of the multiplier for the UK in 2011. You are advised to show your working.

(2)

.....

.....

.....

.....

(c) Which **one** of the following is a likely cause of an increase in the value of an economy's multiplier?

- A An increase in the marginal propensity to save
- B An increase in the basic rate of income tax in the economy
- C A decrease in the marginal propensity to import
- D A decrease in investment in the economy

Answer:

(1)

(Total for Question 2 = 4 marks)

3 The chart below shows the annual percentage change in the UK Consumer Price Index (CPI)

Annual percentage change in UK CPI, January 2008 – October 2013

(Source: <http://www.ons.gov.uk/ons/rel/cpi/consumer-price-indices/november-2013/consumer-price-inflation-summary--november-2013.html>)

(a) Define the term ‘inflation’.

(1)

.....

.....

(b) Which one of the following can be inferred from the chart?

- A There was deflation in the UK economy between September 2008 and September 2009
- B The CPI inflation rate was higher in September 2012 than in September 2009
- C From January 2011 to January 2012, the average price level in the UK fell
- D From May 2010 to September 2010, the cost of living in the UK fell

Answer:

(1)

(c) Explain **one** limitation of using the CPI to measure the rate of inflation.

(2)

.....

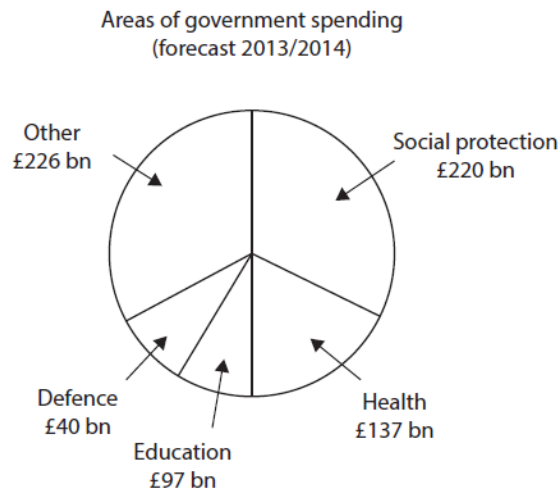

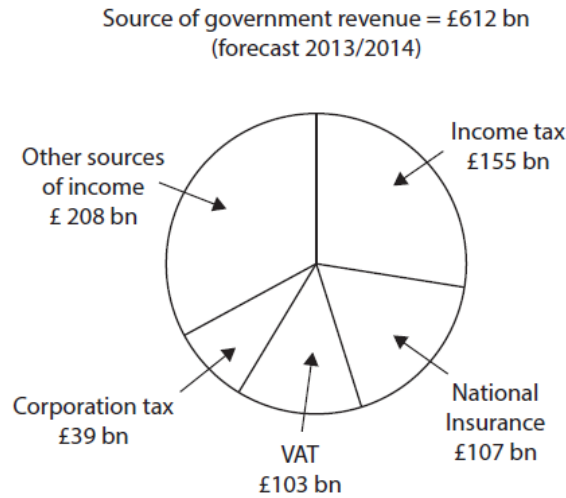

.....

.....

.....

(Total for Question 3 = 4 marks)

4 The charts below show forecast UK Government revenue and government spending for the financial year 2013/2014.

(Source: Budget 2013, HM Treasury, <https://www.gov.uk/government/publications/budget-2013-documents>)

(a) Which **one** of the following can be inferred from the charts above?

The UK government forecast that for the financial year 2013/2014:

- A it would earn five times as much revenue from income tax as from corporation tax
- B it would spend more on health, than on education and defence added together
- C more than one quarter of its revenue would come from VAT
- D spending on social protection would comprise more than 30% of its total spending

Answer:

(1)

(b) Using the data in the two charts, calculate the size of the UK government's forecast budget deficit for the financial year 2013/2014.

(3)

.....

.....

.....

.....

.....

.....

(Total for Question 4 = 4 marks)

5

(a) Define the term ‘productivity’.

(1)

(b) Using a classic long-run AS curve, annotate the diagram below to show the effect of an increase in productivity on the equilibrium level of real national output and the average price level of the economy.

(2)

(c) Which one of the following statements is correct?

- A The Keynesian long-run AS curve implies that an economy may have a negative output gap in the long run
- B The Keynesian long-run AS curve is perfectly inelastic at all levels of real national output
- C The classic long-run AS curve implies that an economy may have spare capacity in the long run
- D The classical long-run AS curve is perfectly elastic at all levels of real national output

Answer:

(1)

(Total for Question 5 = 4 marks)

SECTION B

Read Figures 1 and 2 and extract (A) before answering Question 6.

Answer ALL Questions 6(a) to (e), and EITHER Question 6(f) OR Question 6(g)

Question 6

UK consumption, investment and trade

Figure 1: UK real annual business investment, 1997-2012 (seasonally adjusted)

(Source: <http://www.ons.gov.uk/ons/rel/bus-invest/business-investment/q3-2013-provisional-results/stb-business-investment-q3-2013-provisional.html#tab-Business-Investment-and-other-components-of-GFCF>)

Figure 2: British pound (£) to US dollar (\$) exchange rate, 1 January 2013 to mid-February 2014

(Source: <http://www.tradingeconomics.com/united-kingdom/currency>)

Extract A

Why Britain needs a pay rise

UK growth in 2013, has been caused mainly by increases in consumption. Rising consumption tends to encourage companies to invest. The increase in demand for goods and services means firms need more productive capacity, often moving to bigger premises and buying capital equipment. Crucially, though, they only do so if they think the increase in consumption is likely to be permanent.

At the start of 2013, it was hard to see why consumer spending would rise. The economy had recorded little growth for two years and confidence was low. Inflation had been higher than earnings growth during 2012, making it hard for families to manage.

Three factors combined to change the picture: cheap credit, the Bank of England's funding for lending scheme (FLS), and rising consumer confidence. The Bank of England cut its official interest rate to 0.5% in early 2009, but it took a long time for the monetary stimulus to have an impact.

It only really did so when FLS was announced in the summer of 2012. This was a deal under which the commercial (high street) banks could borrow more cheaply from the Bank of England provided they passed on the benefits to their customers.

The idea was that household and business borrowers would benefit: loans would become more readily available and the interest rates charged on them would be lower. Lending to businesses was disappointing, but the impact on the mortgage market was rapid and significant: more mortgages were approved, and at lower rates of interest. This contributed to the improvement in the housing market, which in turn boosted confidence, leading to higher spending, and this led to higher growth.

Consumers ran down their savings to fund this higher spending. Again, this is not unusual. Households become more cautious in troubled times and they save more just to be on the safe side.

However, unless consumers are willing to save less and less and borrow more and more, there is only so long this process can continue. Eventually, consumer spending growth has to be the result of rising real incomes rather than falling savings.

After a year in which the consumer has been the driving force behind the expansion of the economy, 2014 should be the year when investment contributes to growth. Many of the conditions for an increase in business spending are in place: companies are cash rich, profitability is good, interest rates are set to stay low, and ageing capital stock needs replacing.

The one factor not in place is the most important one of all: an increase in real wages. If companies believe that consumers will carry on spending, they are much more likely to go ahead with new investment projects. If they think consumer spending will not increase, then they will be unwilling to invest. This will mean that inflationary pressures build up and the trade deficit will continue to widen.

(Source: adapted from 'Why Britain needs a pay rise', Larry Elliott, The Guardian, 29 December 2013 <http://www.theguardian.com/money/2013/dec/29/why-britain-needs-pay-rise>)

(a) With reference to Figure 1, explain what has happened to real annual business investment since 2008.

(4)

.....

.....

.....

.....

.....

.....

.....

.....

.....

.....

(b) With reference to Figure 2, explain the likely effect of an appreciation of the British pound (£) against the US dollar (\$) on the volume of UK imports from, and UK exports to, the USA.

(5)

.....
